1 PROCEEDINGS 2 (10:03 a.m.) 3 CHIEF JUSTICE ROBERTS: We will hear argument first this morning in Case 22-976, 4 Garland versus Cargill. 5 6 Mr. Fletcher. 7 ORAL ARGUMENT OF BRIAN H. FLETCHER ON BEHALF OF THE PETITIONERS 8 9 MR. FLETCHER: Thank you, Mr. Chief Justice, and may it please the Court. 10 11 To fire a rifle fitted with a bump 12 stock, the shooter simply places his trigger finger on the built-in finger ledge and uses his 13 14 other hand to press the front of the rifle 15 forward. As long as the shooter maintains that 16 steady forward pressure, the rifle will fire 17 continuously until it runs out of bullets, and 18 it will empty a 100-round magazine like the ones 19 used in the Las Vegas shooting in about 10 20 seconds. Those weapons do exactly what Congress 21 meant to prohibit when it enacted the 2.2 prohibition on machineguns, and those weapons 23 are machineguns because they satisfy both 24 disputed parts of the statutory definition. 25 First, a rifle with a bump stock fires

4

1 more than one shot by a single function of the 2 trigger. In common usage today as in 1934, a function of the trigger happens when some act by 3 the shooter, usually a pull, starts a firing 4 sequence. With a semiautomatic rifle, it fires 5 one shot for each function of the trigger 6 7 because the shooter has to manually pull and release the trigger for every shot. But a bump 8 stock eliminates those manual movements and 9 allows the shooter to fire many shots with one 10 11 act, a forward push. 12 Now Respondent says that a separate 13 function of the trigger happens every time the 14 trigger on a traditional rifle moves backwards 15 and releases the hammer, even if it moves 16 without any further manipulation by the shooter. 17 But that is inconsistent with 18 contemporaneous usage, does not account for guns 19 with other kinds of triggers, and would make it 20 trivially easy to evade the ban on machineguns just by automating the back-and-forth movement 21 2.2 of the trigger after the shooter's initial pull. 23 Second, a rifle with a bump stock 24 fires more than one shot automatically, that is, 25 through a self-regulating mechanism. Once the

14

shooter presses forward to fire the first shot, the bump stock uses the qun's recoil energy to create a continuous back-and-forth cycle that fires hundreds of shots per minute. Now Respondent says that that cycle is not automatic because the shooter has to keep up the forward pressure to keep the cycle going. But many traditional machineguns likewise require the shooter to maintain backward pressure on the trigger to maintain continuous fire. Either way, a single motion both initiates and maintains a multi-shot sequence, and either way, the weapon is a machinegun. I welcome the Court's questions. JUSTICE THOMAS: Mr. Fletcher, how

15 16 does a machinegun -- what would I have to do to 17 fire a machinegun?

18 MR. FLETCHER: It depends on the 19 machinegun. Some, it's a push of a -- a push of 20 a button. Some, it's a pull of the trigger. The statutory definition is, does it shoot more 21 2.2 than one shot automatically by a single function 23 of the trigger? JUSTICE THOMAS: But I don't have to 24 25 do anything else? I don't have to put pressure

5

1 on it or anything else? 2 MR. FLETCHER: It depends on the qun 3 again. So if you imagine -- I think what your question is getting at is, if you take a 4 5 traditional M16 rifle --6 JUSTICE THOMAS: Yeah. 7 MR. FLETCHER: -- what we often think of when we think of a machinegun, you're right, 8 9 to fire more than one shot, you pull the trigger 10 and you have to hold it back, and as long as you 11 maintain that backward pressure on the trigger, 12 it keeps shooting. 13 JUSTICE THOMAS: With a bump stock, 14 what would I do different? 15 MR. FLETCHER: You would do different 16 the -- both the initial motion and the motion 17 that continues. It's the same thing in the 18 sense that one motion automates back-and-forth 19 movement and results in multiple shots. JUSTICE THOMAS: So what -- what --20 21 MR. FLETCHER: But it's a different 2.2 motion. 23 JUSTICE THOMAS: -- is happening with 24 the -- a trigger-initiated firing of a 25 machinegun? What do I have to do other than

б

1 depress the trigger? 2 MR. FLETCHER: With a traditional 3 machinegun, again, take an M16 -- and, again, we think they're all machineguns -- but I 4 understand the question to be take an M16, you 5 pull the trigger back and you hold it and it 6 7 keeps shooting. 8 JUSTICE THOMAS: Okay. With --9 MR. FLETCHER: With a bump stock, you push forward, and that both initiates and 10 11 continues the firing. 12 JUSTICE THOMAS: And what is happening 13 with the trigger when you have the recoil? 14 MR. FLETCHER: That's exactly right. 15 So I think this gets to Respondent's primary 16 argument on function of a trigger, which is that 17 the difference with a bump stock is that it 18 fires multiple shots automatically by automating 19 the movement of the trigger. 20 So my friend says the trigger moves 21 back and forth every time a shot is fired. Our 2.2 view is that those subsequent movements of the 23 trigger aren't functions of the trigger because 24 they're not responding to separate acts, 25 separate pulls, or anything else by the shooter.

7

8

1 They're just the result of the --2 JUSTICE THOMAS: So what is happening 3 with the trigger when someone doesn't need a bump stock to bump-fire a weapon? 4 MR. FLETCHER: So this is the man --5 6 the unassisted manual bump firing --7 JUSTICE THOMAS: Yeah. MR. FLETCHER: -- that's described, 8 9 where an expert can take a regular semiautomatic 10 rifle and hold it loosely enough that they can 11 do something like bump firing. And I think, in 12 our view there too, there's just one function of the trigger because the first push starts the 13 14 sequence and then the sequence continues. The 15 ATF explained and we agree that that's not 16 automatic because there's no self-regulating mechanism. The user has to control the recoil. 17 18 JUSTICE THOMAS: So what's the 19 difference? The same thing is happening with 20 the trigger. 21 MR. FLETCHER: The same thing's 2.2 happening with the trigger, and I think that's 23 why we would say, with manual bump firing, there 24 is just a single function of the trigger. 25 There's one action that initiates the firing

1 sequence. We think it's not automatic because 2 there's no self-regulating mechanism. The user 3 is having to do all of the work that the bump stock automates for you on a rifle fitted with a 4 5 bump stock. 6 CHIEF JUSTICE ROBERTS: I'm have --7 JUSTICE BARRETT: What about -- oh. CHIEF JUSTICE ROBERTS: -- having a 8 9 little trouble with the non-trigger hand. Are you just holding the gun, or are you moving, 10 11 pushing it forward and then back and forward and 12 then back? 13 MR. FLETCHER: So I think the best 14 place to look for this, Mr. Chief Justice, is 15 the district court's factual findings, which are 16 at pages 10 -- 102a to 104a of the Petition 17 Appendix. And what he explained is that from 18 the shooter's perspective, it's just one 19 continuous forward push. The expert at trial 20 said, mentally, you're doing nothing but pushing 21 forward. 2.2 Now, if you look and watch the slow --23 CHIEF JUSTICE ROBERTS: Continuous --24 continuously pushing forward or --25 MR. FLETCHER: You --

1 CHIEF JUSTICE ROBERTS: In other 2 words, are you holding it with pressure or are 3 you moving your hand? MR. FLETCHER: So what you are doing 4 -- I want to distinguish between those two 5 6 things actually --7 CHIEF JUSTICE ROBERTS: Yeah. 8 MR. FLETCHER: -- because what you are 9 doing is just pushing forward. Now, if you look at the videos that we cite in Footnote 1 of our 10 11 reply brief, some of them are in slow motion, 12 and they show that when the shooter is doing this, the hand is moving back and forth very 13 14 fast, 600 times a second. 15 That's not happening because the 16 shooter is able to move their hand back and 17 forth 600 -- or -- or, I'm sorry, 600 times a 18 minute. That's not happening because the 19 shooter can move their hand back and forth that 20 fast. That's happening because every time a shot is fired, the recoil drives the -- the 21 2.2 rifle backwards, overcomes that steady forward pressure momentarily. That's what lets the 23 24 trigger reset and then another shot to be fired 25 again.

1 So, from the shooter's perspective, we 2 view it as one act, and we think that's what the district court found. 3 JUSTICE KAGAN: So would it be right 4 5 to say that the pressure is -- you know, on a 6 typical machinegun where you're pulling and 7 you're feeling, you know, continual backward pressure, and on this, you're feeling continual 8 9 forward pressure of the opposite hand. 10 MR. FLETCHER: Exactly. 11 JUSTICE KAGAN: Is that right? 12 MR. FLETCHER: Exactly right. I think 13 that's exactly what the district court found. 14 JUSTICE BARRETT: Mr. Fletcher, so I 15 did watch all of these videos and try to figure out exactly what this looks like. And I just 16 17 want to ask you about this bump-firing thing. 18 MR. FLETCHER: Mm-hmm. 19 JUSTICE BARRETT: So what if I design 20 something and I call it a bump band, because I 21 gather you can do this with --2.2 MR. FLETCHER: Yeah. 23 JUSTICE BARRETT: -- bands and you can 24 do it with your belt loop. 25 So what if I design and market

1 something I call a bump band to help me turn my 2 semiautomatic, you know --3 MR. FLETCHER: Yeah. JUSTICE BARRETT: -- in the same way? 4 Why wouldn't that then be a machinegun under the 5 6 statute? 7 MR. FLETCHER: So we think that's still not functioning automatically because 8 9 that's not a self-regulating mechanism. My 10 understanding is that what those devices do is 11 they help the shooter keep their trigger finger 12 still, but the shooter still has to manage the movement of the rifle back and forth, hold it so 13 14 that it moves backwards just the right distance 15 in just the right direction, then hold it again 16 so it moves forward in just the right distance 17 in just the right direction. 18 And what makes a bump stock different 19 is that it's a device that is built for just 20 this purpose. It has the finger ledge that 21 holds your finger in place, but then it also has 2.2 a sliding function built in so that when a shot 23 is fired, the recoil automatically pushes the 24 rifle back, lets it disengage from the trigger 25 so the shooter doesn't have to manually release

it, and then allows it to slide forward again,
 again, just the right distance in just the right
 direction.

JUSTICE BARRETT: Maybe Mr. Mitchell can help me understand from his point of view what that means, because it seems like it helps you do it better and in a more stable way but that it functions the same way.

But -- but the other question I 9 have -- look, intuitively, I am entirely 10 11 sympathetic to your argument, I mean, and it --12 and it seems like, yes, that this is functioning like a machinegun would. But, you know, looking 13 14 at that definition, I think the question is, why 15 didn't Congress pass that litigation -- I mean 16 that legislation to -- to make this cover it 17 more clearly?

18 I think your argument depends on 19 volition, right, so let me give you a hypothetical, and then tell me if you think this 20 satisfies the definition of a machinegun. 21 2.2 Let's imagine someone builds a fully 23 automatic machinegun, and I won't try to come up 24 with the technology for exactly how this is going to happen, but they install a tripwire on 25

1 their property and they just leave the gun there 2 unattended, walk away. Somebody trips the wire 3 and then it begins shooting lots of rounds. 4 MR. FLETCHER: Yeah. JUSTICE BARRETT: Does that satisfy 5 6 your definition of a machinegun? 7 MR. FLETCHER: I think it does, yes. 8 JUSTICE BARRETT: Why? 9 MR. FLETCHER: Because a single act 10 and, you know, I think we've used different words like volition. I think what we're -- the 11 12 idea that we're trying to get at is, does some 13 separate act, is that required, some manual act 14 required for each shot, or is a single 15 continuous act resulting in the firing of 16 multiple shots. 17 That's an unusual way to activate a 18 machinegun, obviously, but I think, even if it's 19 a tripwire, that's still one act by a person that initiates a multi-shot fire. 20 21 JUSTICE BARRETT: But it's an 2.2 unintentional act in the same way you might say 23 if your finger -- because, for the bump stock to 24 work, you still have to have your finger right 25 there, right?

1 MR. FLETCHER: You do, yeah. 2 JUSTICE BARRETT: And -- and it -- and 3 it -- according to the Fifth Circuit, what you're focusing on is the definition, you know, 4 it looked at it from the perspective of the gun 5 6 and the machinery of the gun, but you still do 7 need your finger there to kind of pull back the 8 trigger the same way that you would if it was volitional. 9 10 MR. FLETCHER: So not quite, actually, 11 Justice Barrett. I think this is important. 12 When -- in the typical way that you fire these bump stocks -- and this the Fifth Circuit 13 14 acknowledged at 21a of the Petition Appendix --15 you don't initiate firing by pulling backward 16 with your trigger finger. The trigger finger 17 stays completely stationary. 18 JUSTICE BARRETT: You push. 19 MR. FLETCHER: You initiate by pushing. And what the expert said and the 20 21 district court found is you could replace your 2.2 trigger finger with a little plastic post attached to the bump stock and it would work in 23 24 exactly the same way. 25 So it's -- it's true that you have to

keep your finger there, and if you moved your 1 2 finger away, the bump firing sequence would stop, but that's a pretty trivial additional 3 piece of input from the shooter. Really, what's 4 starting and continuing the sequence is the push 5 forward. 6 7 JUSTICE BARRETT: Thank you. JUSTICE JACKSON: Can I ask you, just 8 9 kind of maybe stepping back a moment, why do these various distinctions with respect to 10 11 operations matter? 12 I mean, I -- I read this statute to be a classification statute, that Congress is 13 directing everyone or us to identify certain 14 15 kinds of weapons, and those certain kinds of 16 weapons are being treated in a particular way. 17 They're being prohibited. 18 And so I guess what I'm trying to 19 understand is, if -- if it's true that, you 20 know, the distinction that is being focused on 21 here is the one between the movement of the 2.2 trigger going back and forth or the trigger 23 staying the same, I'm trying to understand why that matters for the purpose of this 24 25 classification.

17

1 MR. FLETCHER: So I think we don't 2 think it does because we don't think "function 3 of the trigger" means movement of the trigger. We think it means act of the shooter. 4 That's how it was used at the time by 5 6 educated speakers of English, including the 7 president of the NRA when he proposed the 8 language that became this statute to Congress, 9 and ever since, people have equated function of 10 the trigger with pull of the trigger. That 11 makes perfect sense if, like us, you read 12 "function of the trigger" to mean some act by the shooter. I don't think that works on my 13 14 friend's account. 15 JUSTICE JACKSON: But I quess I'm 16 wondering -- I thought your answer was going to 17 be we don't think it matters because of 18 something you said in the intro, which was 19 that's -- these are the kind of weapons that 20 Congress were -- was intending to prohibit 21 because of the damage they cause or something 2.2 like that. Like I read the word "function" to 23 be doing significant work in this statute. 24 And when, you know, "function" is 25 defined, it's really not about the operation of

18

1 the thing. It's about what it can achieve, what 2 it's being used for. So I see Congress as 3 putting function in this. The function of this trigger is to cause this kind of damage, 800 4 rounds a second or whatever. 5 And -- and -- and so the 6 7 classification of weapons that we're trying to identify with this statute are those that 8 9 function in that same way. 10 MR. FLETCHER: So, Justice Jackson, I agree with most of that, but I want to be 11 12 careful because our -- our view is not that 13 because Congress banned machineguns because 14 they're dangerous, anything that's dangerous or 15 that shoots fast is a machinegun. 16 Our -- we draw the evident purpose of 17 Congress that we think my friend's 18 interpretation would frustrate from the text 19 that Congress enacted. 20 JUSTICE JACKSON: Right. And so how 21 about anything in which the trigger functions in 2.2 the same way, and by "function," I don't know 23 that that necessarily means it has to move in 24 the same way. It has to operate in the same 25 way. It can function in the same way insofar as

19

1 it automatically allows for 800 rounds to be 2 released. 3 MR. FLETCHER: So exactly. We think the function of the trigger is what lets the 4 shooter start the firing sequence. And we think 5 6 all of the parts of the statutory definition are 7 aimed at we're worried about guns that let you shoot many shots without repeated manual 8 9 actions, right. So it's -- it's single function of the trigger. Does the shooter have to do one 10 11 thing or many things? 12 JUSTICE JACKSON: Thank you. 13 JUSTICE GORSUCH: Mr. Fletcher, on --14 on that score, can we just step back a minute? 15 I can certainly understand why these items 16 should be made illegal, but we're dealing with a 17 statute that was enacted in the 1930s, and 18 through many administrations, the government 19 took the position that these bump stocks are not 20 machineguns. 21 And then you -- you adopted an 2.2 interpretive rule, not even a legislative rule, 23 saying otherwise that would render between a 24 quarter of a million and a half million people 25 federal felons and not even through an APA

1 process they could challenge subject to 10 years 2 in federal prison, and the only way they can 3 challenge it is if they're prosecuted, and they may well wind up dispossessed of guns, all guns 4 in the future, as well as a lot of other civil 5 6 rights, including the right to vote. 7 And I -- I guess I just want your reaction to -- to that. And I believe there are 8 9 a number of members of Congress, including 10 Senator Feinstein, who said that this 11 administrative action forestalled legislation 12 that would have dealt with this topic directly, 13 rather than trying to use a nearly 100-year-old 14 statute in a way that many administrations 15 hadn't anticipated. 16 Thoughts? 17 MR. FLETCHER: There's a lot packed in 18 there, so as you might expect, I have a lot of 19 thoughts. I think the main one is this Court 20 often concludes that the government has 21 interpreted a statute the wrong way and doesn't 2.2 hesitate to correct the government's mistakes. 23 I think the government should do the same thing. 24 After the Las Vegas shooting, the 25 deadliest shooting in our nation's history, I

20

think it would have been irresponsible for the ATF not to take another closer look at this prior interpretation, which was reflected in a handful of classification letters, and to look at the problem more carefully.

6 And having done that, I think it would 7 have been irresponsible if the ATF concluded, as 8 it did, that these devices are prohibited under 9 the best reading of the statute for the ATF not 10 to fix its errors.

11 JUSTICE GORSUCH: Then why not do a 12 legislative rule properly and in which -- I -- I know you did notice-and-comment, but it was an 13 14 interpretive rule, and an interpretive rule you 15 can more or less just issue and you don't even 16 have to put it in the Federal Register. I mean, 17 maybe you do in some circumstances, but not all. 18 MR. FLETCHER: Well, Justice --19 JUSTICE GORSUCH: And -- and -- and 20 you're -- you're -- you're creating a class of, 21 again, between a quarter of a million and a half 2.2 million people who have, in reliance on past 23 administrations, Republican and Democrat, who 24 said that this does not qualify in a very old 25 statute, taken actions. And an interpretive

1 rule you can't even challenge in an APA posture. MR. FLETCHER: Well, we are in an APA 2 3 posture. They are challenging an interpretive rule, and -- and --4 JUSTICE GORSUCH: Well, I understand 5 6 that, but in your reply brief, you say, oh, 7 don't touch that because that's not before us. 8 That's not part of the OP. And in an 9 interpretive rule, you don't get an APA 10 challenge. You get -- you -- you get a criminal 11 prosecution against you is what you get. 12 MR. FLETCHER: So I -- I quess I 13 disagree with that on a number of levels. First, I would think it would be better for 14 15 those who are concerned about administrative 16 power that we acknowledge this is an 17 interpretive rule. 18 The ATF doesn't have the power to make 19 something a crime that wasn't a crime before. It's not a crime to violate the rule. It has 20 been and always will be a crime to violate the 21 2.2 statute. The ATF is saying we got that wrong 23 before and we're fixing it now. 24 And you're right, it would be horribly 25 unfair to prosecute people who possessed these

devices in reliance on the agency's past assurance, but that is taken care of through doctrines like entrapment by estoppel, which ensure that no one has been and no one will be prosecuted for possessing these guns during -or these devices during a time when ATF said it was legal.

But that's not a reason to shackle the 8 9 ATF and certainly not a reason to shackle this 10 Court to adopt something other than the best 11 reading of the words Congress wrote. And it's 12 true, Congress wrote those words 90 years ago, 13 but we think it used capacious language like 14 function of a trigger instead of pull of a 15 trigger and then, in 1968, added parts that can 16 be used to convert something into a machinegun 17 precisely because it understood that Americans 18 are -- have a lot of ingenuity and a lot of 19 creativity.

There are a lot of ways to build something that is a machinegun, and I don't think you should hesitate from applying the broad language that Congress wrote, consistent with the meaning that it has always had. JUSTICE KAVANAUGH: What's the --

1 JUSTICE SOTOMAYOR: Could I -- thank 2 you. 3 Are you representing on behalf of the government that you're not going to prosecute 4 anyone prior to 2017? Anyone who wasn't a felon 5 6 or -- or disqualified for some other reason? 7 MR. FLETCHER: I am. ATF made very clear in enacting this rule that anyone who 8 turned in their bump stock or destroyed it 9 before March of 2018 would not face prosecution. 10 11 As a practical matter also, the 12 statute of limitations for this offense is five years, so in a month, the statute of limitations 13 14 would be gone. We have not prosecuted those 15 people. We won't do it. And if we try to do 16 it, I think they would have a good defense based 17 on entrapment by estoppel. 18 JUSTICE SOTOMAYOR: Second, the 19 back-and-forth here leads me to believe that at 20 best there might be some ambiguity. Now the question is what's the best reading. And we 21 2.2 have a whole slew of doctrines that talk about 23 that with respect to that we shouldn't render statutes ineffective by an interpretation. 24 25 That's not the best reading, correct?

1 MR. FLETCHER: Correct, exactly. 2 JUSTICE SOTOMAYOR: And I think we've said that as far back as 1824. 3 MR. FLETCHER: In The Emily, exactly. 4 JUSTICE SOTOMAYOR: In The Emily case. 5 6 And so I think your position is, if anyone's in 7 doubt about this interpretation, that not 8 including something that basically you hold in 9 your hand and you let the recoil move it back 10 and forth, if that's not automatic, then it 11 doesn't make any sense that this is not a machinegun, correct? 12 13 MR. FLETCHER: That's part of our 14 argument, absolutely. And it's not just this 15 device. I mean, we cite a number of the 16 examples, and -- and there are many more, of 17 things that people have done to try to get 18 around the ban on machineguns, and accepting 19 some of the interpretations that my friend is offering today would legalize not just bump 20 stocks but those devices as well. 21 2.2 JUSTICE SOTOMAYOR: One final 23 question. Justice Barrett said something about 24 she hoped Mr. Mitchell would explain something 25 about why there was a difference in the

functioning between the belt and the gun. Could
 you go through that again so that -- I think I
 understand it, but --

MR. FLETCHER: Of course. So, as I 4 acknowledge and as the ATF explained in the 5 6 rule, it is possible to do bump firing, meaning 7 that the rifle moves back and forth and bumps against your stationary finger. An expert can 8 9 do that without any assistive device at all. And you can also do it if you have a lot of 10 11 expertise by hooking your finger into a belt 12 loop or using a rubber band or something else like that to hold your finger in place. 13

14 We don't think those things function 15 automatically because the definition of 16 "automatically," I think everybody agrees, is by 17 means of a self-regulating mechanism. That's 18 what a bump stock is. It's a device that is 19 purpose-built to harness the recoil energy of 20 the gun to automate the process of releasing the 21 trigger to move the rifle back just the right 2.2 distance in just the right direction so that the 23 trigger resets and then to ensure that the rifle moves forward again, again, just the right 24 25 distance, just the right direction.

1 We think the cycle that's created by 2 that means is by means of a self-regulating 3 process. It's possible to do the same thing with a lot of manual work and manual control and 4 expertise, but that's not unusual to say that 5 6 something can be done automatically by a device 7 if you eliminate a lot of manual movements that someone like an expert could take to do the same 8 9 thing. 10 JUSTICE KAVANAUGH: Can I ask you 11 about mens rea, to pick up on Justice Gorsuch's 12 questions? For prosecuting someone now, what 13 mens rea showing would the government have to 14 make to convict someone? 15 MR. FLETCHER: So I think the relevant 16 case is Staples, and I think what the Court held 17 in Staples is that you have to be aware of the 18 facts that render your weapon a machinegun. 19 JUSTICE KAVANAUGH: So, even if you 20 are not aware of the legal prohibition, you can be convicted? 21 2.2 MR. FLETCHER: That's right, but 23 that's true of all machineguns, I mean, all different sorts of devices. I think the 24 25 distinct problem here is the one that's created

1 by the fact that the agency was previously 2 saying that these were not machineguns. We 3 acknowledge that those people who, in reliance 4 on that --JUSTICE KAVANAUGH: And that -- that's 5 6 going to ensnare a lot of people who are not 7 aware of the legal prohibition. MR. FLETCHER: So I quess I don't 8 9 think so, Justice Kavanaugh. I think the ATF --10 one of the reasons, to Justice Gorsuch's point, 11 this is an interpretive rule that went through 12 notice-and-comment -- the reason was in part 13 because the agency knew that it had previously 14 been saying something different. It wanted to 15 maximize public notice. This is something 16 that's gotten a lot of coverage. 17 JUSTICE KAVANAUGH: Why not -- why not 18 require the government to also prove that the 19 person knew that what they were doing was wrongful, was illegal? 20 21 MR. FLETCHER: Well, I think that's 2.2 not the understanding that this Court adopted in 23 Staples. If the Court wanted to revisit that in 24 another case, a criminal case, you could. We 25 haven't briefed that question here.

1 But I think, to the extent that you're 2 concerned about that, it's -- it's not a concern 3 unique to bump stocks. We mention all sorts of other devices, the forced reset trigger that we 4 mentioned. The problem of people coming up with 5 6 devices that they want -- that they think get 7 close to the line but don't go over but that, in fact, go over the line and turn them into 8 9 machineguns isn't new and could come up 10 anywhere. 11 The problem here, we acknowledge, is 12 ATF used to say something different about these, but we think that's taken care of by the 13 14 rulemaking and the doctrine of entrapment by 15 estoppel. 16 JUSTICE GORSUCH: Because people will 17 sit down and read the Federal Register? 18 MR. FLETCHER: No. I think because I 19 think people who have these devices --20 JUSTICE GORSUCH: That's what they do in their evening for fun. Gun owners across the 21 22 country crack it open next to the fire and the 23 dog. 24 (Laughter.) 25 MR. FLETCHER: I take that point. Ι

30

1 think, Justice Gorsuch, the fact that this 2 rulemaking happened has not gone unnoticed in 3 the community of people who are interested in 4 firearms. Many people have availed themselves of the right to challenge our interpretation. 5 6 We're defending it in court. The Supreme Court 7 is hearing it. I agree not everyone is going to find out about those things, but we've done 8 9 everything the government could possibly do to 10 make people aware. 11 JUSTICE GORSUCH: Let me ask you about the function of the trigger. You liken it to a 12 stroke of a key or -- or -- or -- or a throw of 13 14 the dice or a swing of the bat. Those are all 15 things people do. 16 MR. FLETCHER: Mm-hmm. 17 JUSTICE GORSUCH: A function of the 18 trigger, do people function triggers? I 19 thought, you know, in -- in -- in, you know, maybe somewhere in fifth -- fifth grade grammar, 20 21 I learned that was an intransitive verb. 2.2 MR. FLETCHER: Yeah. 23 JUSTICE GORSUCH: And people don't 24 function things. They may pull things, they may throw things, but they don't function things. 25

And, again, it's a very old statute, and it was designed for an obvious problem in the 1930s and Al Capone, and people were -- with a single function of the trigger, that is, the thing itself, was moved once, and that's what they wrote.

7 And maybe they should have written something better. One might hope they might 8 9 write something better in the future. But 10 that's the language we're stuck with. Help me. 11 MR. FLETCHER: That is the language 12 we're stuck with, but I don't think it's as 13 narrow as you suggest for a couple of reasons. 14 I agree it's awkward to talk about a person 15 functioning a trigger, but there's an easy 16 explanation. The reason Congress used that 17 word, not "pull," is because Congress knew that 18 there were lots of different ways to activate a 19 trigger and wanted to cover all of them. 20 And I think the reason you know that 21 it's referring to what the shooter does --2.2 there's really two. One is that's the way it's

24 I'm giving you is the same one Karl Frederick,

been understood ever since. The interpretation

23

25 the president of the NRA, and many other courts,

1 executive officials, Congressmen gave at the 2 same time. They used "pull" and "function" 3 interchangeably.

And, second, I think, even if you've said we're going to focus just on the trigger, the function of an object isn't just some action by the object. It's the mode of action by which it fulfills its purpose. And the purpose of a trigger is to accept some input from the user.

10 And the way you know that is how 11 everyone reacts when someone attaches it to some 12 contraption like the AutoGlove, which is a glove 13 that you put on and you push a button and it has 14 a little piston that pulls the trigger really 15 fast, or you attach a fishing reel, like the one 16 the Fifth Circuit confronted in Camp, where you 17 flip a switch and it spins and turns the trigger over and over again. 18

19 On my friend's reading, the function 20 of the trigger with those devices is exactly the 21 same because the curved metal lever is moving 22 back and it's releasing the hammer every single 23 time. But everyone, my friend included, 24 recognizes that that's not the function of the 25 trigger in those devices.

32

1	The function of the trigger is the
2	user's flip of the switch or push of the button
3	because that's the thing that allows an act by
4	the user to initiate a firing sequence.
5	JUSTICE BARRETT: Mr. Fletcher, I I
6	take it that the ATF defined the curved lever
7	that you pull back as the trigger. Could it
8	have defined the bump stock itself as the
9	trigger?
10	MR. FLETCHER: So I I'm not sure
11	that it could have defined the bump stock itself
12	as the trigger. I think we get into this a
13	little bit in the reply in response or a
14	version a different argument maybe than the
15	one that you're thinking of but I think related,
16	in response to a move that's made in the red
17	brief, where we hypothesize that if you had a
18	machinegun that required you to pull the trigger
19	and also hold down a button, it would still fire
20	automatically, and we all understand that, even
21	though you have to do two things rather than
22	one.
23	And what my friend said in the red
24	brief is, well, in that case, maybe the button
25	is part of the trigger too because you have to

1 push the button to keep firing. And what we say 2 in the reply and what I think is true is that if you were going to approach the statute that way, 3 which isn't the way the ATF has, I think you'd 4 still land in the same place because then you'd 5 say it's both the curved metal lever and it's 6 7 the part on the front of the rifle that the user pushes forward in order to initiate and maintain 8 9 the firing sequence. 10 CHIEF JUSTICE ROBERTS: Thank you, 11 counsel. 12 Justice Thomas, anything further? 13 Justice Alito? 14 JUSTICE ALITO: What is the situation of people who have possessed bump stocks between 15 16 the time of the ATF's new rule and the present 17 day or between the time of the new rule and the 18 Fifth Circuit decision? Can they be prosecuted? 19 MR. FLETCHER: I think probably yes, 20 unless they had gotten some judicial relief from 21 the rule. The rule has not been enjoined. Ιt 2.2 hasn't been vacated, writ large, so I think the 23 -- the government has made clear that this is what we think the statute means. 24 25 I'll say in practice that --

1	JUSTICE ALITO: Isn't that disturbing?	
2	People in the Fifth Circuit who have been	
3	possessing firearms since the beginning of 2023,	
4	let's say, they you know, they are aware of	
5	the Fifth Circuit's decision that they can be	
6	criminally prosecuted for doing something that	
7	the court of appeals that governs their	
8	territory has said is not illegal?	
9	MR. FLETCHER: Well, let me give a	
10	practical answer and then a doctrinal answer. I	
11	think, practically, I'm not aware of a lot of	
12	these prosecutions being brought because we	
13	recognize that there is some legal uncertainty.	
14	But I think, doctrinally, that could	
15	happen all the time, Justice Alito. Circuits	
16	disagree about what a criminal law means, and	
17	someone might, in reliance on their circuit	
18	precedent, do something that they think is	
19	lawful under circuit precedent that other	
20	circuits disagree with, that the government	
21	disagrees with, and that this Court ultimately	
22	holds is covered by the statute.	
23	JUSTICE ALITO: When we speak of the	
24	function of an inanimate object, don't we	
25	normally look at what that inanimate abject	

36

1 object does? So why isn't the function of a 2 trigger to release the hammer -- let's look at the -- the -- the M16, the AR-15, the function 3 of -- why isn't the function of the trigger to 4 release the hammer from the sear so that the 5 6 hammer can swing forward and strike? Isn't that 7 the most straightforward interpretation of this? MR. FLETCHER: I don't think so, and I 8 think, even if you thought that was true, just 9 10 looking at the text alone, the three indications 11 that we've talked about, the contemporaneous 12 usage by the president of the NRA and others, 13 the application to other kinds of triggers, 14 which everybody agrees are covered but which 15 don't function by moving the hammer, and then 16 also just evasion. I mean, I talked about some 17 of them, but one of the devices that the Fifth Circuit has held is permissible -- or, I'm 18 sorry, a district court in the Fifth Circuit has 19 20 held is permissible and the Fifth Circuit has 21 declined to stay is something called a forced 2.2 reset trigger, and with a forced reset trigger, 23 the ATF tested it, zip-tied the trigger back, 24 and the gun shot multiple bullets.

25 What the district court said is that

37

1 under my friend's interpretation, its 2 function -- there are multiple functions of the 3 trigger because the trigger is wiggling back and 4 forth imperceptibly and releasing the hammer separately each time, and so it's not a 5 6 machinegun. 7 And I think it's just not reasonable 8 to read the statute that opens it up to that sort of evasion, and we're seeing concrete 9 evidence of that evasion in the Fifth Circuit. 10 11 JUSTICE ALITO: Thank you. 12 CHIEF JUSTICE ROBERTS: Justice 13 Sotomayor? 14 JUSTICE SOTOMAYOR: Just to be clear, 15 when you're citing what Congress people said or 16 what the NRA president said or what we said in 17 some of our decisions because we've used "pull 18 of the trigger" in describing a machinegun's 19 function, correct? 20 MR. FLETCHER: Exactly. 21 JUSTICE SOTOMAYOR: You're not using 22 legislative history in the traditional sense. 23 You are pointing to common usage? 24 MR. FLETCHER: Exactly right, exactly 25 right. We're not speculating. We're not saying

38

1 that the bump stocks are machineguns because the 2 president of the NRA wanted them to be. We're 3 using that as evidence --

4 JUSTICE SOTOMAYOR: Well, that's what 5 the Senate intended. You're saying it's a term 6 of art.

7 MR. FLETCHER: Exactly. If he -- if 8 he had published this in an essay or in The New 9 York Times, we would be pointing to it as 10 evidence of contemporary meaning. We certainly 11 don't think it should be a blessed reading. 12 JUSTICE SOTOMAYOR: Well, you're 13 pointing -- you're pointing to Supreme Court

14 decisions that did it.

MR. FLETCHER: Exactly, as this Court does too. It looks at literature. It looks at all sorts of sources to understand what speakers of English understand the words to mean when Congress used them. And we think this and many other things are powerful indications that we're right about that.

22 JUSTICE SOTOMAYOR: Thank you.

23 CHIEF JUSTICE ROBERTS: Justice Kagan?
24 JUSTICE KAGAN: Mr. Fletcher, you've
25 talked a lot about the mechanics of these

39

1	various devices. Could you give a sense of the
2	different effects of these various devices?
3	So you take on two poles a
4	semiautomatic weapon, let's say, and a
5	conventional machinegun on the on the other.
б	How many bullets and how much time? And then
7	one of these bump stock weapons, where does that
8	fall in the spectrum between those?
9	MR. FLETCHER: Sure. So the rate of a
10	semiautomatic weapon is not a fixed number
11	because it depends both on the weapon and very
12	much on the skill of the shooter. I think the
13	Giffords amicus brief says the theoretical
14	maximum for a very skilled competition shooter
15	with a specialized weapon is something like 180
16	bullets a minute. In practice, it's much, much
17	slower than that for the vast majority of people
18	who would use one of these things.
19	A fully automatic weapon
20	JUSTICE KAGAN: How how much
21	slower?
22	MR. FLETCHER: I think, you know,
23	it it depends. I think more on the order of,
24	you know, 60, something like that. I don't I
25	don't want to represent that that's exact again

1 because there's a lot of variation, but the --2 the point is that's the theoretical max. In 3 practice, it's significantly slower than that. A traditional machinegun like the M16 4 or the M14, things that are issued to members of 5 the American military, shoot in the range of 700 6 7 to 950 bullets a minute. There are obviously bigger things like 8 9 the things mounted on helicopters that shoot 10 much, much faster than that, but I think, for 11 these purposes, that 700 to 900 is about the 12 right benchmark. 13 The Akins Accelerator, the original 14 bump stock, shot at 650 rounds a minute, and the 15 devices at issue here are represented to shoot 16 between 400 and 800 rounds a minute. 17 So right in that range with the M16, 18 the M14, and they do it in the way -- again, 19 I -- I think rates of fire are important, but we acknowledge this is not a rate-of-fire statute. 20 21 It's a function statute. 2.2 But the function was, are you able to 23 fire multiple shots without multiple manual movements? And I think the rate of fire is 24 25 powerful evidence that there are not multiple

41

1 manual movements going on here. 2 JUSTICE KAGAN: Thank you. 3 CHIEF JUSTICE ROBERTS: Justice Gorsuch? 4 Justice Kavanaugh? 5 6 JUSTICE KAVANAUGH: You've referred a 7 lot to the language in 1934 and around that time, but, of course, bump stocks didn't exist 8 around that time. 9 10 What are we to make of that? 11 MR. FLETCHER: So I -- I think you 12 still apply the language and you have to do what 13 you have to do a lot, which is apply language 14 that Congress wrote and apply it to something 15 that didn't exist at the time. You know, none 16 of these workarounds, the fishing reel, the 17 AutoGlove, the forced reset trigger, all of them 18 are new problems. 19 But -- but I think what you can draw is that Congress wrote a statute, chose the word 20 21 "function" deliberately because it didn't want 2.2 to just work -- focus on triggers that pull, and 23 then, in 1968, it added "parts that convert a machine" -- a -- "a normal gun into a 24 25 machinegun" because it recognized that people

1	try to do things to semiautomatic weapons in
2	order to give them these same characteristics of
3	multiple rounds with a single manual action.
4	JUSTICE KAVANAUGH: And then what's
5	your explanation, maybe common-sense explanation
6	or some other explanation, for why, when this
7	does become an issue, the Bush Administration,
8	the Obama Administration, Senator Feinstein, all
9	say no?
10	MR. FLETCHER: Yeah.
11	JUSTICE KAVANAUGH: Bump stocks are
12	are not covered because, if it were so, I don't
13	want to use the word "clear," but if so, if
14	your if your position were correct, oh, just
15	this is a new thing, obviously, covered by this
16	old statutory language, you would expect the
17	Bush Administration and the Obama Administration
18	and Senator Feinstein to say, of course, it's
19	covered by, and and they didn't, and that's
20	reason for pause. It doesn't it's not
21	dispositive, but it's reason for pause.
22	And I just what what's your
23	explanation for that, if you have one?
24	MR. FLETCHER: So I agree with you.
25	It's it's it's worth looking at. It's

43

1	worth asking. I think that's why it's so
2	important to put it in context.
3	And if I could, so when the ATF first
4	looks at these, it's the Akins Accelerator in
5	2002. That's the bump stock with a spring in
6	the back where you don't even have to push
7	forward. And initially ATF tests it, the
8	prototype breaks, but the ATF writes a
9	classification letter, which is something
10	relatively informal, just goes to the
11	manufacturer, doesn't contain a lot of legal
12	reasoning, says this isn't a machinegun because
13	it doesn't have multiple functions of the
14	trigger.
15	Very quickly thereafter, ATF corrects
16	that error and in 2006 says the Akins
17	Accelerator is a machinegun because it does
18	function by it does shoot multiple shots by a
19	single function of the trigger.
20	So that part we've been consistent on.
21	The director of the ATF issued a ruling, 2006-2,
22	that was consistent on that, and the agency has
23	held that position ever since, and that's mostly
24	what we've talked about today.
25	It's true that in a series of

44

1 additional -- other informal classification 2 letters issued between 2007 and 2017, the ATF said that non-mechanical bump stocks, those like 3 the ones at issue here without a spring where 4 you have to push forward, weren't machineguns 5 6 because they didn't shoot automatically. 7 But I -- I think it's important to recognize those are informal, they don't include 8 a lot of legal analysis, and I think maybe most 9 10 importantly, no one defends the ATF's 11 interpretation from those letters. What the ATF 12 said there is this doesn't have springs or 13 mechanical parts, so it doesn't make guns -- the 14 gun function automatically. 15 I think even my friend doesn't defend 16 that interpretation. Everybody recognizes that 17 there are things like Glock switches that we 18 discuss in our reply brief that you can add to a 19 machinegun -- a semiautomatic weapon that make it a machinegun, and I think the fact that no 20 one is defending the ATF's prior interpretation 21 2.2 is a good indication that when Attorney General 23 Sessions and Attorney General Barr revisited this and we've continued to defend it since, 24

25 they did a much more careful examination and got

1 it right. 2 And then Senator Feinstein, you know, 3 I -- I take your point. I guess, with all respect to Senator Feinstein, I would say that 4 the comments from a legislator who's trying to 5 6 get a piece of legislation passed and is trying 7 to demonstrate the need for that legislation by disagreeing with the administration about the 8 9 scope of current law are not a particularly probative source of the meaning of the words 10 11 that Congress enacted in 1934. 12 JUSTICE KAVANAUGH: Thank you. 13 CHIEF JUSTICE ROBERTS: Justice 14 Barrett? 15 JUSTICE BARRETT: No. CHIEF JUSTICE ROBERTS: 16 Justice 17 Jackson? 18 JUSTICE JACKSON: Can I just be clear 19 on this function point? Because they say, I 20 think, that a single function of the trigger in -- as it appears in this statute is directing 21 2.2 consideration of whether the trigger is moving 23 only once. 24 And I think you're saying that, no, 25 when it says the function of the trigger, it's

46

1 not how the trigger operates, it's -- the 2 function of the trigger is what it achieves, and 3 the function that I think you're saying is that if by single operation, meaning single movement 4 of the person, you can achieve firing multiple 5 6 shots without multiple manual movements, that's 7 what you said, that covers the function of the 8 trigger. Is that what you're saying?

9 MR. FLETCHER: Exactly. And I think the thing that makes this clearest is the boxes 10 11 hypothetical on page 30 of our brief where we 12 say imagine somebody builds a black box with a 13 button on the top and the shooter pushes the 14 button once and bullets come out of the front at 15 a very high rate. On our view, that's a 16 machinegun.

17 But, on my friend's view, if the 18 inventor sets it up so that after the shooter 19 pushes and releases the button the button keeps 20 moving up and down in the same way on its own, I 21 think he's stuck saying that that's not a 2.2 machinegun because the trigger is functioning each time a shot is fired. We don't think 23 24 that's a plausible construction of the statute. 25 JUSTICE JACKSON: So we'll ask him

47

1 about that. And -- and I guess yours is 2 consistent or it -- it accounts for 3 automatically more than one shot being in this 4 definition? 5 MR. FLETCHER: Exactly. 6 JUSTICE JACKSON: Okay. Thank you. 7 CHIEF JUSTICE ROBERTS: Thank you, 8 counsel. Mr. Mitchell. 9 ORAL ARGUMENT OF JONATHAN F. MITCHELL 10 11 ON BEHALF OF THE RESPONDENT 12 MR. MITCHELL: Mr. Chief Justice, and 13 may it please the Court: 14 The statutory definition of machinegun 15 extends only to weapons that fire more than one 16 shot automatically by a single function of the 17 trigger. Mr. Cargill's non-mechanical bump 18 stocks fall outside the statutory definition for 19 two separate and independent reasons. 20 First, a bump stock equipped rifle can 21 fire only one shot per function of the trigger 22 because the trigger must reset after every shot and must function again before another shot can 23 be fired. 24 25 The trigger is the device that

1 initiates the firing of the weapon, and the 2 function of the trigger is what that triggering device must do to cause the weapon to fire. 3 The phrase "function of the trigger" 4 can refer only to the trigger's function. 5 Ιt has nothing to do with the shooter or what the 6 7 shooter does to the trigger because the shooter does not have a function. 8 9 The statute is concerned only with what the trigger does and whether a single 10 11 function of that trigger produces more than one 12 shot. 13 Second, a bump stock equipped rifle 14 does not and cannot fire more than one shot 15 automatically by a single function of the 16 trigger because the shooter, in addition to 17 causing the trigger to function, must also 18 undertake additional manual actions to ensure a 19 successful round of bump firing. 20 Everything about the bump firing process is manual. And there is no automating 21 2.2 device, such as a spring or a motor, in any of 23 Mr. Cargill's non-mechanical bump stocks. 24 The process depends entirely on human 25 effort and exertion as the shooter must

49

1 continually and repeatedly thrust the forestock 2 of the rifle forward with his non-shooting hand 3 while simultaneously maintaining backward pressure on the weapon with his shooting hand. 4 None of these acts are automated. And 5 6 the Solicitor General has yet to identify any 7 component of Mr. Cargill's devices that automatically performs any task that is 8 9 necessary for bump firing. The statute is 10 unambiguous as applied to Mr. Cargill's 11 non-mechanical bump stocks, and we ask the Court 12 to affirm on that ground. 13 JUSTICE THOMAS: Behind the 14 government's argument is a sense that the --15 this statute was initially enacted because of 16 what some of the individuals did during 17 Prohibition. 18 MR. MITCHELL: Mm-hmm. 19 JUSTICE THOMAS: And there was 20 significant damage from machineguns, carnage, people dying, et cetera. And behind this is a 21 2.2 notion that the bump stock does the exact same 23 thing. 24 So, with that background, why 25 shouldn't we look at a broader definition of

1 "function," one suggested by the -- the 2 government, as opposed to just the narrow 3 function that you suggest? MR. MITCHELL: The problem with the 4 government's argument, Justice Thomas, is that 5 6 the phrase "single function of the trigger" can 7 only be construed grammatically to focus on the trigger's function and not on what the shooter 8 9 does to the trigger.

10 And that's so for many reasons. For 11 -- for one thing, there cannot be a subject of 12 "function" because a shooter does not function a 13 trigger. Only a trigger can have a function and 14 not a shooter.

15 Now the Solicitor General is trying to 16 replace the word "function" in the statute with 17 the word "pull." And if the statute had 18 actually said a single pull of the trigger, that 19 phrase would clearly refer to an act taken by 20 the shooter because only a shooter can pull the 21 trigger. The trigger certainly can't pull 2.2 itself.

23 So, if the Court is going to interpret 24 the statute based on what it says rather than 25 based on the purposes or perhaps the overarching

51

1 goals of what the 1934 legislature might have 2 been, there's no way it could accept the government's construction of the statute because 3 it is changing the enacted words. 4 5 JUSTICE JACKSON: Can I give you a way 6 possibly? 7 MR. MITCHELL: Please. 8 JUSTICE JACKSON: All right. So the 9 statute says "function," as we've all 10 identified. 11 MR. MITCHELL: Yes. 12 JUSTICE JACKSON: And as far as I can 13 tell, the sort of common usage of the word "function" is not its operational design. It's 14 15 not the mechanics of the thing. It is what it 16 achieves, what it's being used for. 17 MR. MITCHELL: Mm-hmm. 18 JUSTICE JACKSON: So I found 19 definitions. "Function" is defined as the 20 action for which a person or thing is specifically fitted or used; the acts or 21 22 operations expected of the person or thing. 23 So, if we take that definition --24 MR. MITCHELL: Mm-hmm. 25 JUSTICE JACKSON: -- it seems to me

52

1 that, through its use of the word "function," 2 Congress was trying to capture a class of 3 weapons in which a trigger is used once to achieve a certain result, which says, in the 4 statute, automatic firing many times. 5 6 And so weapons with bump stocks have 7 triggers that function in the same way. They -through a single, right, pull of the trigger or 8 touch of the trigger, you achieve the same 9 result of automatic fire --10 11 MR. MITCHELL: No. 12 JUSTICE JACKSON: -- of the weapon. 13 So why -- why is that inconsistent with grammar 14 or the -- the -- the way the statute reads? 15 MR. MITCHELL: Well, the premise of 16 Your Honor's question is not true. A single 17 discharge of the trigger produces only one shot. 18 It doesn't produce a round of automatic fire. 19 The only way you get to repeated shots with a 20 bump stock equipped rifle is for the shooter 21 himself to continually undertake manual action 2.2 by thrusting the forestock of the rifle forward 23 with his non-shooting hand. JUSTICE JACKSON: But that's not the 24 25 trigger. He's only touched the -- he's holding

53

1 the trigger or touched the trigger once, right? 2 MR. MITCHELL: No. He touches the 3 trigger every single time. He has to bump the 4 trigger. 5 JUSTICE JACKSON: Well, I'm sorry, the 6 machine is -- but the machine is moving --MR. MITCHELL: The machine --7 JUSTICE JACKSON: -- to make his --8 MR. MITCHELL: The machine is 9 10 moving --11 JUSTICE JACKSON: Okay. 12 MR. MITCHELL: -- but the trigger has 13 to be bumped. 14 JUSTICE JACKSON: So then let me ask you a question. 15 16 MR. MITCHELL: Yes. 17 JUSTICE JACKSON: The -- the other 18 question is -- I understood this to be a 19 classification statute in the sense that Congress is trying to identify and classify 20 certain weapons. So, if you're right --21 2.2 MR. MITCHELL: Mm-hmm. 23 JUSTICE JACKSON: -- I want to understand why that matters. Why does it matter 24 25 for the purpose of this statute that we have

54

1 backwards pressure in the ordinary case of a 2 machinegun and forward pressure here? You're 3 saying there's a distinction being drawn. Bump stocks don't fit into this category because of 4 this distinction, and I quess I don't understand 5 6 why Congress would have prohibited one and not 7 the other. Why -- why does it matter? MR. MITCHELL: Well, it matters 8 9 because the statute turns on whether the bump stock equipped rifle will fire more than one 10 11 shot automatically by a single function --12 JUSTICE JACKSON: Right. But they're -- the -- the -- the --13 14 MR. MITCHELL: -- of the trigger. So to answer that --15 16 JUSTICE JACKSON: -- the statute is in 17 con -- in context. 18 MR. MITCHELL: Yes. 19 JUSTICE JACKSON: The statute is 20 classifying certain weapons for prohibition. 21 MR. MITCHELL: Right. 2.2 JUSTICE JACKSON: So, for it to make 23 sense, we have to understand why this category 24 of weapons are ones that Congress wants to prohibit. And you're suggesting that Congress 25

55

1 is prohibiting through this classification weapons in which we hold it backwards and 2 3 automatic fire happens, but we push it forward 4 and automatic fire happens, Congress says no, 5 that's not in the --6 MR. MITCHELL: There's no automatic 7 fire. I'm sorry. Justice Jackson --8 JUSTICE JACKSON: Okay. 9 MR. MITCHELL: -- there is no automatic fire with a --10 11 JUSTICE JACKSON: Sorry. Eight 12 hundred -- 800 bullets -- the conversation with Justice Kagan suggested that, through a bump 13 14 stock, you can achieve the same kinds of result 15 in terms of the amounts of bullets that are 16 being ejected. 17 MR. MITCHELL: That is true. 18 JUSTICE JACKSON: Is that correct? 19 Okay. 20 MR. MITCHELL: It has a very high rate 21 of fire, but it's not automatically fired. 2.2 JUSTICE JACKSON: Right, but what I'm 23 \_ \_ MR. MITCHELL: This is --24 25 JUSTICE JACKSON: -- suggesting is

1 that the category of prohibition is about the 2 high rate of fire as opposed to, you know, the 3 movement of the trigger. And if you're right that it's about the movement of the trigger, I'm 4 just asking why, why would -- why would Congress 5 6 want to prohibit certain things based on whether 7 the trigger is moving as opposed to certain 8 things that can achieve this, you know, lethal 9 kind of spray of bullets? 10 MR. MITCHELL: Because the statute was 11 written in 1934, about a hundred years before we 12 had bump stocks. So Congress drafted the 13 statute at that time to capture the type of 14 weaponry it wanted to prohibit in 1934, so --15 JUSTICE KAGAN: Your interpretation, 16 Mr. Mitchell, though -- you've said this several 17 times in your brief -- captures a fair number of 18 weapons that nobody had on their radar screen in 19 1934, so let me ask you about that and where the 20 line is. 21 MR. MITCHELL: Sure. 2.2 JUSTICE KAGAN: If a gun fires 23 multiple shots at the push of a button or the 24 flip of a switch and just keeps firing -- -25 MR. MITCHELL: Yes. Clearly, that's a

57

machinegun. 1 2 JUSTICE KAGAN: -- that's a 3 machinequn? 4 MR. MITCHELL: Yes. That's United 5 States against Camp essentially. JUSTICE KAGAN: Okay. And if a -- if 6 7 -- if a gun does the same thing, except now it's the push of two buttons? 8 9 MR. MITCHELL: So one button that 10 fires and then the other button that's 11 necessary? 12 JUSTICE KAGAN: Yes. 13 MR. MITCHELL: Both buttons necessary? 14 JUSTICE KAGAN: Yes. 15 MR. MITCHELL: And neither are by 16 themselves sufficient? 17 JUSTICE KAGAN: Yeah. I thought you 18 say also, on page 45 of your brief, that a 19 push-operated machinegun that requires the 20 shooter to push and hold two buttons, that that 21 would also qualify. 2.2 MR. MITCHELL: Right, because the two 23 buttons together are acting as the trigger in 24 that scenario. 25 JUSTICE KAGAN: Okay.

1 MR. MITCHELL: The trigger is the 2 device that initiates the firing of the weapon. 3 JUSTICE KAGAN: Okay. MR. MITCHELL: So, if you need to push 4 two buttons and not just one, then both, the two 5 6 buttons combined, are the trigger. 7 JUSTICE KAGAN: Okay. So now, instead of doing two buttons, suppose you had one button 8 9 and with the other hand you held the trigger. 10 MR. MITCHELL: One button that you're 11 pushing and then with the other hand you're --12 JUSTICE KAGAN: Yeah. Instead of two 13 buttons --14 MR. MITCHELL: Right. 15 JUSTICE KAGAN: -- it's one button and 16 you held the trigger. 17 MR. MITCHELL: And you need to do both to fire? You can't just do one? 18 19 JUSTICE KAGAN: Same as you just had 20 to do with two buttons. 21 MR. MITCHELL: Mm-hmm. 2.2 JUSTICE KAGAN: And you conceded the 23 two buttons is a machinegun. So now I'm saying, 24 instead of pushing two buttons, you push one 25 button and you hold the trigger.

```
1
               MR. MITCHELL: It's going to depend on
 2
      what -- how we define "trigger." And as -- the
 3
      answer to that will not always be clear. The
 4
      question is, can you extend the holding of
 5
      United States against Camp to this particular
 6
     situation? The trigger --
 7
               JUSTICE KAGAN: I mean, I have to
8
      say --
9
               MR. MITCHELL: Yeah.
10
               JUSTICE KAGAN: -- I think you don't
11
      quite know what the answer to that is -- if you
12
     have an answer, let me know -- because the
     difference between pushing two buttons --
13
14
               MR. MTTCHELL: Mm-hmm.
15
               JUSTICE JACKSON: -- for me and
16
     pushing one button and holding the trigger is
17
     not self-evident.
18
               MR. MITCHELL: To pushing a button and
19
     holding the trigger and you need to do both --
               JUSTICE KAGAN: Same.
20
21
               MR. MITCHELL: -- and both --
2.2
               JUSTICE KAGAN: Boy, I thought I was
23
     being pretty clear here.
24
               MR. MITCHELL: Yeah.
25
               JUSTICE KAGAN: You push two buttons.
```

60

1 You say it's a machinegun. Now you don't push 2 two buttons. You have to push one button and 3 hold the trigger. 4 MR. MITCHELL: That shouldn't make a difference if they're both going to be 5 considered -- they either have to both be 6 7 machineguns or neither. I don't think you can't draw a distinction between --8 9 JUSTICE KAGAN: Correct. MR. MITCHELL: I agree with that much. 10 11 JUSTICE KAGAN: And you said the first 12 is a machinegun, so the second has to be a 13 machinegun. 14 MR. MTTCHELL: Mm-hmm. 15 JUSTICE KAGAN: Okay. So now I guess 16 I want to know, what's the difference between 17 pushing a button and holding the trigger and 18 pushing the barrel and holding the trigger? 19 You've just described a bump stock. 20 MR. MITCHELL: No. No, because you 21 don't need to push the barrel forward to fire 2.2 the weapon. You can fire the weapon just by 23 clicking the trigger every single time, like a 24 normal semiautomatic weapon fires. So, no. 25 JUSTICE KAGAN: But -- but what the

61

1 bump stock does --2 MR. MITCHELL: Mm-hmm. 3 JUSTICE KAGAN: Oh. Oh, you're saying 4 you don't have to put pressure? 5 MR. MITCHELL: Well, it's neither 6 necessary nor sufficient to fire the weapon. 7 The trigger is the device --JUSTICE KAGAN: All right. 8 MR. MITCHELL: -- that initiates the 9 firing of the weapon. So --10 11 JUSTICE KAGAN: Here's what I'm trying 12 to say. You've -- and I appreciate --13 MR. MITCHELL: Mm-hmm. 14 JUSTICE KAGAN: -- your, you know, going down this road of hypotheticals with me. 15 But, if -- if pushing one button and 16 17 holding a trigger is a machinegun, then --18 MR. MITCHELL: Mm-hmm. 19 JUSTICE KAGAN: -- a device that works 20 by pushing the barrel, the front of the gun, essentially -- I don't know about these things 21 22 -- and holding the trigger seems again, to me, 23 to essentially do the same thing. 24 MR. MITCHELL: It --25 JUSTICE KAGAN: And that is how

1 everybody uses these devices. Like, I mean, 2 maybe you could use the device differently, but 3 the entire point of this device is that you exert forward pressure and you have your finger 4 on the trigger, and then a torrent of bullets 5 shoots out. So I don't understand why it's any 6 7 different --MR. MITCHELL: It is different. 8 JUSTICE KAGAN: -- from pushing a 9 button and holding the trigger --10 11 MR. MITCHELL: Mm-hmm. 12 JUSTICE KAGAN: -- pushing the barrel 13 and holding the trigger. 14 MR. MITCHELL: The difference is you 15 don't need to push the barrel to fire the weapon. In the other hypotheticals that Your 16 17 Honor was describing, you need to push those 18 buttons to make the weapon fire. It is not 19 necessary --20 JUSTICE KAGAN: So the fact that there 21 is a conceivable possibility of using these bump 22 stock devices in a way that does not take 23 advantage of what these bump stock devices do and are able to do --24 25 MR. MTTCHELL: Mm-hmm.

1 JUSTICE KAGAN: -- the fact that there 2 is that conceivable possibility is what you are 3 resting your entire argument on? MR. MITCHELL: No. Our argument 4 depends on what's the trigger. The trigger is 5 the device that initiates the firing of the 6 7 weapon. A bump stock does not change the 8 9 trigger in any way. It does not alter the nature of the trigger. 10 The other hypothetical 11 devices that Your Honor is describing are 12 changing the triggering device either by 13 requiring pushing two buttons rather than just 14 one -- nothing in the bump stock changes the 15 trigger. The trigger is still in this situation 16 the curved metal lever, and the Solicitor General has never contested that point, neither 17 18 has DOJ, at any point in this litigation. 19 JUSTICE GORSUCH: Mr. Mitchell, I --20 JUSTICE ALITO: And, Mr. Mitchell, this con -- this conversation is totally 21 2.2 confusing me because I -- I thought that your 23 argument depended on what the trigger -- that 24 the function of the trigger was what the trigger 25 does mechanically inside the weapon, and,

therefore, whether you have one trigger or two triggers or three triggers or 10 buttons, it doesn't matter. It matter -- what matters is what the trigger or the triggers do inside the gun.

A -- an M6 -- back in the day when it was possible to fire the standard military issue rifle, M16, from the 1970s on automatic, my understanding is that the military doesn't even -- you can't even do that anymore. All you can fire at most is a burst of three shots.

But there are two buttons on -- on the -- on the old-time M16. You have to flip the -well, there are three. You have to -- you have to flip it over from semiautomatic to automatic. That's one button. And then the other button is the pulling of the trigger.

18But do I misunderstand your argument?19MR. MITCHELL: No, you're not20misunderstanding at all. The function of the21trigger is what the trigger does to cause the22weapon to fire. That's what "function of the23trigger" means.24But, to determine that, we need to

25 first determine what exactly the trigger is

65

before we can consider what is the function of 1 2 the trigger. And there will be certain types of 3 devices like this motorized trigger device in 4 United States against Camp where the trigger actually is changed because you're no longer 5 6 pulling the curved metal lever to set off the 7 weapon; instead, you're flipping some switch that starts the motor --8 9 JUSTICE ALITO: Can you think of any 10 11 JUSTICE SOTOMAYOR: Now I'm completely 12 lost. The trigger is not doing anything. It's the person doing something. And it's the person 13 14 choosing on an M16 whether they're going to keep 15 the switch on semiautomatic or put the switch on 16 automatic and turn the M16 into a machinegun. 17 And on a machinegun, it's not the 18 trigger that does this. It's the pressure that 19 the shooter is using to hold the trigger down 20 that permits it to keep going. MR. MITCHELL: That's what causes the 21 2.2 trigger to function. 23 JUSTICE SOTOMAYOR: Well, but the --24 MR. MITCHELL: The -- the -- the test 25

1	JUSTICE SOTOMAYOR: That's what the
2	government is saying, which is you're not
3	looking at what the what the trigger is
4	doing. You're looking at what the shooter is
5	doing. And is he using a force, keeping the gun
6	down keeping the trigger down or holding the
7	bump stock and letting it shoot back and forth
8	in an automatic recoil.
9	Those are not things that changes the
10	automatic nature of the firing.
11	MR. MITCHELL: It still has nothing to
12	do with what the shooter does. The question is
13	what does the trigger do when it functions. And
14	if the trigger allows more than one shot to fire
15	per function of the trigger, what is the single
16	function of the trigger? And on a semi
17	JUSTICE SOTOMAYOR: But the
18	trigger's the trigger you're saying can be a
19	button. So why can't it be the bump stock
20	that's forcing this thing automatically in a
21	recoil motion to go back and forth?
22	MR. MITCHELL: Because the bump stock
23	doesn't fire the weapon. The bump stock is just
24	a case in which the weapon slides back and
25	forth. That doesn't do anything to fire the

67

1 weapon. The only way --2 JUSTICE BARRETT: They have defined 3 the bump stock as the trigger? 4 MR. MITCHELL: No one defines the bump 5 stock as the trigger in this case. 6 JUSTICE BARRETT: Could they have? 7 MR. MITCHELL: No, they could not because the bump stock is neither necessary nor 8 9 sufficient for the firing of the weapon. It's 10 the curved metal lever on the semiautomatic 11 rifle that causes the weapon to fire. That --12 JUSTICE GORSUCH: Mr. --13 MR. MITCHELL: Yes? 14 JUSTICE GORSUCH: Sorry. Mr. 15 Mitchell, it seems to me the spirit of some of 16 the questions you're getting are in the nature 17 of the anticircumvention principle --18 MR. MITCHELL: Mm-hmm. JUSTICE GORSUCH: -- that, okay, maybe 19 in 1934 "function of the trigger" meant the 20 firing, the -- the -- the essential thing that 21 2.2 causes the weapon to fire. 23 But the high rate of fire that's 24 achievable through bump stocks is effectively 25 the equivalent, and we should take cognizance of

1 that. 2 Your thoughts? 3 MR. MITCHELL: It's just not what the statute says. It has nothing to do with the 4 rate of fire. 5 6 JUSTICE KAGAN: But -- but the statute 7 doesn't say a lot of things that you've agreed are prohibited under the statute. The statute 8 9 doesn't, you know, think about buttons, and the statute doesn't think about switches. 10 And I have to think that if I gave you 11 12 a different hypo that said it was voice-activated that you would have to say yes, 13 14 that's a machinegun too. And the statute 15 doesn't think about that. 16 And I quess what Justice Gorsuch is 17 saying is that you in arguing this case have had to do something very sensible because, 18 otherwise, it would seem, you know, like, you 19 20 know, that this statute is loaded with 21 anticircumvention devices. The entire way this 2.2 statute is written suggests that Congress was very aware -- aware that there could be small 23 24 adjustments of a weapon that could get around 25 what Congress meant to prohibit.

1	And and and in all kinds of
2	ways, you're accepting of that and saying yes,
3	you can't circumvent it by that. You can't
4	circumvent it by non-conventional triggers. You
5	can't circumvent it by, you know, all these
6	things that these hypotheticals I've been
7	giving you. But you can circumvent it through
8	this one mechanism.
9	MR. MITCHELL: I'm not conceding that
10	you can circumvent the statute, Justice Kagan.
11	We're just interpreting the word "trigger,"
12	which is a term that appears in the statutory
13	text and it has to be interpreted.
14	When you're dealing with the motorized
15	trigger device, that's an easy case in one
16	direction because that has changed the trigger
17	from the curved metal lever because the shooter
18	is no longer using that to fire the weapon.
19	Instead, there's a switch that is
20	flipped and that switch is now triggering the
21	device because that is the function, turning on
22	the switch, that then causes automatic fire to
23	occur because there's some motor that's moving
24	the trigger back I'm sorry, I shouldn't say
25	the trigger the curved metal lever back and

70

1 forth. That's United States against Camp. 2 This is an easy case because the bump 3 stock doesn't change the trigger in any way. JUSTICE JACKSON: But what do you 4 5 do --6 MR. MITCHELL: Everyone --7 JUSTICE JACKSON: -- what do you do 8 about modification pieces? I quess I don't 9 understand your argument insofar as I had taken 10 the United States to always take the position, 11 and I actually had a case about this when I was 12 a district court judge, where the question was 13 were these flat metal pieces that were mailed 14 internationally to the defendant machineguns. 15 And we were all confused. The jury 16 was confused because we had this notion of what 17 a machinegun was. And the government argued that this metal piece was a machinegun and 18 19 brought in experts that said, under this 20 statute, anything that can be used to convert a 21 regularly operating semiautomatic weapon into 22 one that rapid fires qualifies. MR. MITCHELL: I'm sorry, Justice 23 24 Jackson, rapid --25 JUSTICE JACKSON: That's wrong?

MR. MITCHELL: -- rapid fire is not 1 2 the test under the statute. It's not whether it 3 fires rapidly. It's whether it fires more than one shot automatically --4 5 JUSTICE JACKSON: Okay, I'm sorry. 6 I'm sorry. 7 MR. MITCHELL: -- by a single function 8 of the trigger. 9 JUSTICE JACKSON: I'm sorry. 10 MR. MITCHELL: Okay. 11 JUSTICE JACKSON: They said it could. 12 But what we focused on was not whether that metal piece changed the way the trigger 13 14 operated. Now maybe you're saying that's wrong, 15 but I guess what I'm focused on is that your 16 argument seems to rest on the assumption that 17 the function of the trigger, as Justice Alito says, is what the trigger does inside the gun. 18 19 MR. MITCHELL: That's correct. 20 JUSTICE JACKSON: Why is it irrational, wrong, et cetera, to think of the 21 22 function of the trigger as what it does to cause 23 the weapon to automatically fire more than one shot? 24 25 If that's what we mean by "function of

1 the trigger, " which is in the statute, 2 automatically more than one shot, and what we're 3 saying is by -- if -- if one operation causes the trigger to -- the function -- causes the 4 function of the trigger to make the weapon 5 6 automatically fire more than one shot, I guess I 7 don't understand why your reading is preferable to that when -- when -- when the common 8 9 understanding of a machinegun is that it is 10 doing this sort of thing at the end of the day. 11 MR. MITCHELL: Well, it's because the 12 trigger on a bump stock equipped rifle does not cause the rifle to automatically fire more than 13 14 one shot. You still have to have manual action 15 by the shooter in response to every single shot 16 that gets fired. The shooter has to continue to thrust that forestock forward --17 18 JUSTICE JACKSON: Okay. And if --19 MR. MITCHELL: -- with his 20 non-shooting hand. 21 JUSTICE JACKSON: -- that's true -that's true -- that -- that is --2.2 23 MR. MITCHELL: It is true, yes. 24 JUSTICE JACKSON: Okay. That is a 25 distinction. My other question then comes in.

73

1	Why does that distinction matter from Congress's
2	perspective in terms of it writing a statute
3	that it was trying to prohibit that?
4	If you're right that that's the
5	relevant distinction, I guess I need a reason
6	why there's something inherently so much worse
7	about a situation in which you push it forward
8	rather than pull it back that that that we
9	can reasonably say that that was a particular
10	category that Congress wanted to prohibit?
11	And that's what I'm missing in your
12	argument.
13	MR. MITCHELL: Well, it's because
14	yeah.
15	JUSTICE JACKSON: It doesn't make
16	sense to me that we're going to identify guns on
17	that purpose and say those are the ones that
18	prohibit that are prohibited when others that
19	achieve the same result are not.
20	MR. MITCHELL: It's because the
21	statute was written in 1934, and Congress wasn't
22	thinking about bump stocks when they wrote this
23	statute.
24	JUSTICE BARRETT: Mr. Mitchell
25	CHIEF JUSTICE ROBERTS: Counsel,

1 you've said several times that you thrust with 2 your non-trigger hand, thrust part of the gun 3 forward. 4 MR. MITCHELL: Right. CHIEF JUSTICE ROBERTS: And I 5 6 understood your friend on the other side to 7 focus on it more as maintaining pressure. 8 MR. MITCHELL: Right. CHIEF JUSTICE ROBERTS: Which is it? 9 I mean, do you hold it -- I mean, you have to 10 11 hold it harder at certain points rather than 12 others, or are you actually moving it with the 13 thrusting? 14 MR. MITCHELL: You're definitely 15 moving your hand back and forth. And Mr. 16 Fletcher agreed with us on that point. The hand 17 is moving. 18 I think where our disagreement comes 19 in is that Mr. Fletcher seems to characterize 20 the action of the non-shooting hand, so the left 21 hand for a right-handed shooter, as something 2.2 where you are applying constant pressure in a 23 certain direction, but the recoil is strong 24 enough to overcome that pressure from the 25 non-shooting hand and thereby move the weapon

75

1 backward, despite the forward pressure that's 2 coming from the non-shooting hand. 3 JUSTICE KAGAN: But that means --MR. MITCHELL: There are --4 JUSTICE KAGAN: -- that if a -- if a 5 6 -- I mean, tell me if I'm wrong, but that means 7 that the way a shooter perceives it is by 8 imposing constant forward pressure, not the 9 shooter is thinking I got to do this really 10 fast, you know, going back and forth. 11 MR. MITCHELL: The shooter can do It takes a lot of practice to master the 12 both. 13 art of bump firing. So there is always going to 14 be recoil energy, and no person, I think, is 15 strong enough to push forward in a way that 16 overcomes the recoil energy. If they were, bump 17 firing wouldn't happen. 18 So, for successful bump firing to 19 occur, there needs to be that back-and-forth 20 There's recoil every time the rifle motion. 21 fires. There's still pressure from the left 2.2 hand, or the right hand if you're a left-handed 23 shooter. There's still going to be pressure 24 from that non-shooting hand, but the shooter can 25 decide how much he wants to calibrate that

76

1 pressure in response to the repeated recoils 2 that he's getting from the bump firing. 3 It doesn't have to be the same amount of pressure each time. The shooter just has to 4 make sure that the hand is moving back and forth 5 6 because that's the only way you can have 7 successful bump firing. But to get back to your question, Mr. 8 Chief Justice, I --9 10 JUSTICE KAGAN: But the shooter 11 doesn't make sure that the hand is moving back 12 and forth. That's the way the recoil operates. 13 The shooter just makes sure that he is pushing 14 forward, and then the recoil -- recoil operates 15 to, in fact, even though the shooter is not 16 experiencing this --17 MR. MITCHELL: Mm-hmm. 18 JUSTICE KAGAN: -- is -- is not 19 volitionally experiencing this, the shooter is 20 not moving his hand back and forward. 21 MR. MITCHELL: That's probably right, 2.2 unless the shooter is so strong that he has to ease off a little bit to make sure he doesn't 23 overcome the recoil. But, to my knowledge, I 24 25 don't think there's anybody strong enough to

77

1 make -- to actually be able to keep pushing and 2 forcing it past the recoil energy. But, Mr. Chief Justice, I don't think 3 the answer to this question matters in the end 4 because, even if we accept Mr. Fletcher's 5 characterization where it's just constant 6 7 pressure with the same amount of force continuously over a sustained period of time, 8 9 it's still a manual action. There's nothing 10 automatic about that. The shooter is the one who is pushing. It's human effort, human 11 12 exertion. Nothing automatic at all about this 13 process. 14 And Mr. Fletcher said during his 15 remarks that the bump stock harnesses the recoil 16 energy of the weapon. That is false. With the 17 Akins Accelerator, there is harnessing because 18 the Akins Accelerator has a spring. So there 19 will be certain types of bump-firing devices 20 like the Akins Accelerator where you can 21 accurately say that the bump stock harnesses the 2.2 recoil energy of the weapon. 23 Not so with respect to a 24 non-mechanical bump stock. The weapon recoils.

25 Nothing is harnessed with respect to the recoil

1 energy. And it is the shooter who must, with 2 that non-shooting hand, continue to thrust the 3 weapon forward in response. JUSTICE BARRETT: If I disagree with 4 you about "automatically," can you win solely on 5 "function of a trigger"? 6 7 MR. MITCHELL: Absolutely, yes. Why? 8 JUSTICE BARRETT: 9 MR. MITCHELL: Because "the single function of the trigger" -- the Solicitor 10 11 General has to win on both arguments to prevail. 12 We only need to win on one of the two. So we could win on "automatically" standing alone. 13 We could win on "single function of the trigger" 14 15 standing alone. Or we could win on both. We 16 respectfully ask the Court to rule on both 17 because there's a well-developed circuit split 18 on each of the two sub-issues within the 19 question presented. JUSTICE BARRETT: Well, speaking of 20 "automatically," can you address the question I 21 2.2 asked Mr. Fletcher about a band bump firing? 23 And, you know, he said it was different on the ground of "automatically." But how do you see 24 25 them functioning differently?

1	MR. MITCHELL: They're
2	indistinguishable when it comes to
3	"automatically." Everything involved with the
4	band that Your Honor suggested and also
5	everything involved with Mr. Cargill's
б	non-mechanical bump stock is a manual action
7	undertaken entirely by the shooter.
8	There is no automating device. Mr.
9	Fletcher has yet to identify any device in the
10	non-mechanical bump stock that automates any
11	task that is necessary for successful bump
12	firing. It is all being done by the shooter.
13	There's the recoil after the shot gets
14	fired, and then it is the shooter who must, with
15	his own hand and with his own force, exert
16	pressure forward consistently to make sure that
17	the trigger bumps into his finger. This is all
18	manual. Nothing automatic about it. Nothing at
19	all. And the
20	JUSTICE JACKSON: Can I ask you a
21	variation of the hypothetical black-box scenario
22	that the government puts forward in their and
23	you might be familiar with it. It's on
24	MR. MITCHELL: Yeah.
25	JUSTICE JACKSON: It's in their brief.

1 So they say that we've got two boxes, each of 2 which continuously fires bullets after the operator presses and releases a button. 3 If I hear you correctly -- or maybe 4 5 you can just tell me. 6 MR. MITCHELL: Right. 7 JUSTICE JACKSON: Box 1, the operator pushes the button and the bullets come out 8 automatically. Box 2, the operator holds his 9 10 finger slightly above the box, and there's something, you know, under the box that pushes 11 12 the box up into his finger. So the finger is touching the trigger like a million times 13 14 because the -- in order for it to operate, the 15 box is going like so --16 MR. MITCHELL: Yeah. 17 JUSTICE JACKSON: -- pushing up. One is a machinegun, one is not. Same rate of --18 MR. MITCHELL: Yeah. 19 20 JUSTICE JACKSON: -- velocity of 21 bullets coming out. That's your view? 2.2 MR. MITCHELL: The answer to that 23 question depends on what is the trigger. 24 JUSTICE JACKSON: Okay. 25 MR. MITCHELL: And the holding of

1 United States against Camp, that Fifth Circuit 2 decision that said motorized trigger devices are 3 machineguns --4 JUSTICE JACKSON: Yeah. MR. MITCHELL: -- and the rationale of 5 that case would be extended to this 6 7 hypothetical. So I think the way to think of this, 8 9 Your Honor, is there are going to be easy cases 10 at each of the extremes, and there are going to 11 be harder cases in the middle. The easy case is 12 United States against Camp because that is a 13 situation where the trigger was changed. It no 14 longer is the curved metal lever. 15 JUSTICE JACKSON: Right, right, right. 16 MR. MITCHELL: It's instead a switch. 17 Everyone agrees with that. 18 JUSTICE JACKSON: But I guess -- and 19 -- and your -- and your view is what makes it 20 easy or hard is not the sort of thought of mine 21 that, like, geez, what makes it easy or hard is 2.2 actually distinguishing those two in the real 23 world, like in terms of what is actually 24 happening? 25 MR. MITCHELL: Mm-hmm.

82

1 JUSTICE JACKSON: You think what makes 2 it easy or hard is just identifying whether the 3 finger is -- is moving because the box is moving or because the person is pushing it down? 4 MR. MITCHELL: What makes it hard is 5 6 whether it's changed the nature of the trigger 7 in some way. Clearly, that happened in Camp. 8 This situation with Mr. Cargill, 9 there's not even an argument that the trigger 10 has been changed. DOJ at no point in this 11 litigation has argued that bump stocks change 12 the nature of the trigger or change the trigger 13 at all. There will be harder cases in the 14 15 middle, such as the forced reset triggers and 16 some of these hypotheticals that were discussed 17 in the D.C. Circuit's opinion in Guedes, where there may be a question as to what exactly the 18 19 trigger is and then how does that trigger 20 function. 21 So, again, going back to Camp, when 2.2 there's a flip of a switch that turns on a motor and that motor then forces the curved metal 23 lever back and forth, that's automatic fire. 24 25 That's a machinegun because we now have a new

24

trigger, the switch. It's no longer the curved metal lever. So can that rationale be extended to some of these hypotheticals where we talk about black boxes and oscillating buttons? What exactly is the trigger there? Is it merely the button? Is it the motor that's moving the button up and down? It's arguable either way. We don't think the Court should resolve any of that, I understand, but for us to take a position on the question, it's all going to depend on whether you can extend the holding of Camp to these new situations. The Akins Accelerator is a good example to think about because, in 2006, when ATF changed its position on the Akins Accelerator, ATF initially approved that device in 2002. 2006, it changed its mind. And if you look at the classification letter, their argument rests on an argument similar to what Mr. Fletcher is making today. They cite the legislative history from Karl Frederick and say that "function of the trigger" means "pull of the trigger." That rationale is

25 not going to work if the Akins Accelerator is

83

1 going to be characterized as a machinegun. 2 What might work, though, is if there's 3 some possible argument to extend the holding of United States against Camp to the Akins 4 Accelerator. Does that spring in the Akins 5 6 Accelerator change the nature of the trigger? 7 That's the question that needs to be addressed. If ATF wants to continue to 8 characterize the Akins Accelerator as a 9 10 machinegun, it's going to need to come up with a 11 much better argument than what it offered in 12 2006. We're not closing the door on that possibility, but we do think the actual 13 14 rationale that ATF has used is just as faulty as 15 their rationale for banning non-mechanical bump 16 stocks. 17 CHIEF JUSTICE ROBERTS: Thank you, 18 counsel. 19 Justice Thomas? JUSTICE THOMAS: Mr. Mitchell, the --20 I think we -- you would agree that the bump 21 stock accelerates the rate of fire? 2.2 23 MR. MITCHELL: Absolutely. 24 JUSTICE THOMAS: Why wouldn't you then 25 take the further step of saying it changes the

1 nature of the trigger in doing that? 2 MR. MITCHELL: Because the trigger 3 still has to reset after every single shot. It's not accelerating the rate of fire by 4 changing the trigger. It's accelerating the 5 rate of fire --6 7 JUSTICE THOMAS: That's not really 8 what I'm trying --9 MR. MITCHELL: I'm sorry. 10 JUSTICE THOMAS: So the -- why 11 wouldn't you say that you have enhanced the 12 triggering mechanism by using the bump stock? 13 MR. MITCHELL: Because it's not 14 changing the triggering mechanism at all. It's 15 simply making it easier for the shooter to bump 16 that trigger repeatedly. The nature of the 17 triggering mechanism remains exactly the same. 18 What's going on inside the gun after the trigger 19 gets bumped is no different than what it would be if it were a semiautomatic rifle without the 20 21 bump stock. And that's why the government can't 2.2 win on this "single function of the trigger" 23 point. I think -- I think 24 JUSTICE THOMAS: 25 the difference is that there may be some who

believe -- when -- when you look at it, the nature of the firing has changed as a result of the bump stock. So, if that's changed, why don't you simply then look backwards and say that the nature of the firing mechanism has changed; thus, the nature of the trigger has changed?

8 MR. MITCHELL: What's changed, though, 9 is the rate of fire. And it's still one shot 10 per function of the trigger, even though those 11 shots are coming out of the barrel a lot faster 12 than they were before. The question is, how 13 many functions of the trigger do we have for 14 each of the shots?

15 And the answer is one. If you divide 16 the number of shots that are fired from a bump 17 stock equipped rifle by the number of times the 18 trigger has to function to produce that shot, 19 the answer will always be one, and it will 20 remain that way because nothing in the 21 triggering mechanism has changed. 2.2 CHIEF JUSTICE ROBERTS: Justice Alito? 23 JUSTICE ALITO: Can you imagine a 24 legislator thinking we should ban machineguns, 25 but we should not ban bump stocks? Is there any

87

1 reason why a legislator might reach that
2 judgment?

3 MR. MITCHELL: I think there is. Bump stocks can help people who have disabilities, 4 who have problems with finger dexterity, people 5 who have arthritis in their fingers. 6 There 7 could be a valid reason for preserving the legality of these devices as a matter of policy, 8 9 even while similar weapons, such as the fully automatic machineguns, are being banned. 10 11 Whether Congress would ultimately make 12 that judgment, we would have to wait and find 13 out whether they would decide it along those 14 ways. But there are respectable arguments for 15 why these could remain legal as a matter of 16 policy. 17 JUSTICE ALITO: In --18 JUSTICE SOTOMAYOR: Why would 19 anybody --20 JUSTICE ALITO: I'm sorry. 21 JUSTICE SOTOMAYOR: I'm sorry. 2.2 JUSTICE ALITO: That's okay. In the 23 field of statutory interpretation, Justice 24 Scalia's bête noire was the Church of the Holy 25 Trinity, a case where he thought that the

24

literal language of the statute had to control even though it's pretty hard to think that Congress actually meant that to apply in certain situations. As you see this case, is this another Church of the Holy Trinity case? MR. MITCHELL: I would say it's quite as eqregious as Church of the Holy Trinity, but the arguments the government's making are certainly in the spirit of Holy Trinity, to borrow a phrase that was used from the Holy Trinity opinion, and I don't think a textualist judge can accept the rationale that's being offered by the U.S. Government and they are in their brief especially making purposivist arguments along the lines of what we saw in Church of the Holy Trinity. JUSTICE ALITO: Thank you. CHIEF JUSTICE ROBERTS: Justice Sotomayor? JUSTICE SOTOMAYOR: Why would even a person with arthritis, why would Congress think they needed to shoot 400 to 7- or 800 rounds of ammunition under any circumstance?

25 MR. MITCHELL: You can't choose --

88

1	JUSTICE SOTOMAYOR: If you don't let a
2	person without arthritis do that, why would you
3	permit a person with arthritis to do it?
4	MR. MITCHELL: They don't shoot 400 to
5	700 rounds because the magazine only goes up to
6	50. So you're still going to have to change the
7	magazine after every round. We allow large
8	capacity magazines up to 50.
9	And also, there are many shooters who
10	can pull the trigger of a semiautomatic rifle
11	very quickly, who can accomplish rates of fire
12	similar to those that approach fully automatic
13	weapons. So I don't
14	JUSTICE SOTOMAYOR: All right.
15	Counsel, you spoke about legislative history and
16	and I think you're trying to bat away all of
17	the statements during the legislative process
18	that called functions of the trigger the single
19	pull of the trigger by the shooter.
20	MR. MITCHELL: That's right.
21	JUSTICE SOTOMAYOR: But it's not
22	classic legislative history. It's how people
23	understood a term at the time. That's not
24	legislative history.
25	MR. MITCHELL: Well, it's still

90

1	legislative history. They're just using it for
2	a purpose that they claim
3	JUSTICE SOTOMAYOR: Well, Justice
4	Thomas said in McDonald versus City of Chicago
5	that it's perfectly acceptable to do that, to
6	use, he said, if it's being cited to show what
7	lawmakers how lawmakers used a particular
8	term that's different than what they intended.
9	MR. MITCHELL: So, if we're using
10	legislative history in an effort to discern the
11	original public meaning of the statute, which is
12	how I understand Your Honor's characterization.
13	JUSTICE SOTOMAYOR: Exactly.
14	MR. MITCHELL: And I think that's how
15	Mr. Fletcher is trying to characterize his
16	reliance on this statement from Mr. Frederick
17	JUSTICE SOTOMAYOR: It's not just
18	that.
19	MR. MITCHELL: which is which is
20	the statement of a lobbyist.
21	JUSTICE SOTOMAYOR: We've got
22	statements we've got statements in the House
23	from legislators in the House, we have
24	statements from legislators in the Senate, all
25	of them consistently translating "function of

91

the trigger" to mean a single pull of the
 trigger.

3 MR. MITCHELL: Right. And they're all 4 wrong because the statute also was written to encompass weapons that have push triggers rather 5 6 than pull triggers. And the Solicitor General 7 acknowledges this point in her opening brief. JUSTICE SOTOMAYOR: Well, that -- what 8 9 it suggests to me is that contrary to what 10 you're saying, that is they never understood 11 this to be how the trigger functions but how the 12 shooter functions. MR. MITCHELL: No, I think we should 13 14 draw the exact opposite inference. It proves 15 how unreliable legislative history is as a tool 16 to try to discern what the statute means --17 JUSTICE SOTOMAYOR: We're going to 18 disagree. 19 MR. MITCHELL: -- because -- well, 20 it's because, Justice Sotomayor, the phrase 21 "pull of the trigger" can't be equated with 2.2 "function of the trigger." And even the 23 Solicitor General acknowledges that because they say in their brief that the statute needs to be 24 25 read in a way that encompasses fully automatic

1 weapons that have push triggers rather than 2 triggers that are pulled. So the word "function" --3 4 JUSTICE SOTOMAYOR: And you agree? MR. MITCHELL: I'm sorry, go ahead. 5 6 JUSTICE SOTOMAYOR: And -- and you 7 agree? MR. MITCHELL: I agree that function 8 9 can't be equated with the word "pull." 10 JUSTICE SOTOMAYOR: But the only way 11 you can get there is by looking at what the 12 shooter is doing. 13 MR. MITCHELL: No, that's not --14 JUSTICE SOTOMAYOR: Okay, counsel. 15 Thank you. 16 MR. MITCHELL: -- correct. You don't 17 need to look at what the shooter is doing. A 18 weapon can go off by accident. You don't need a 19 shooter. There's still a function of the 20 trigger if the weapon falls on to the floor and 21 goes off accidentally with a discharge. The 22 trigger has functioned even though the shooter 23 hasn't pulled the trigger or pushed it or bumped it. What matters under the statute is what the 24 25 trigger does.

1 And all these examples that we see in 2 the Solicitor General's brief, Justice Gorsuch 3 mentioned this earlier, when they're taking transitive verbs, when they say swing of the bat 4 or stroke of the key or roll of the dice, all of 5 those are transitive verbs that are capable of 6 7 taking an object. So, when you see swing of the bat, 8 there's obviously an unnamed actor in that 9 sentence that is the subject of the verb swing. 10 The bat can't swing itself. The bat's an 11 12 inanimate object. Function of the trigger is entirely 13 different. Function is an intransitive verb. 14 15 It can't take an object grammatically. It's 16 impossible. Trigger has to be the subject of 17 function. It can't be the object. 18 CHIEF JUSTICE ROBERTS: Thank you, 19 counsel. 20 MR. MITCHELL: I'm sorry. 21 CHIEF JUSTICE ROBERTS: Justice Kagan? 2.2 JUSTICE KAGAN: I quess, Mr. Mitchell, 23 I mean, those four words are not the entire 24 statute, you know, function of the trigger. 25 It's by a function of the trigger and

94

1 what's the by? It's shooting -- you know, 2 presumably, a shooter is there, but, you know, 3 maybe it happens spontaneously, but shooting more than one shot by a single function of the 4 5 trigger. I mean, that's the relevant language, 6 right, shooting more than one shot by a single 7 function of the trigger. And then there's also 8 the automatic thing. 9 MR. MITCHELL: Automatic, yeah, that's 10 right. 11 JUSTICE KAGAN: So I don't want to --12 I don't want to ignore that. But it -- it seems 13 as if you look at the entire phrase, what that 14 means is that Congress had wanted to de-link the 15 number of shots that were coming out of a 16 barrel, right, more than one shot, it wanted to 17 de-link that from a discrete human action. 18 And I would think, you know, it might 19 be you pull the trigger, it might be you push 20 the trigger, it might be you switch on the trigger, it might be you voice-activate the 21 2.2 trigger, there's a discrete human action and it 23 produces a torrent of bullets. 24 And that's exactly what's happening 25 here. You push the bump stock. Now you're --

1	you're saying, well, maybe they didn't define
2	the bump stock as the trigger, but but it
3	it functions in precisely the same way.
4	And a torrent of bullets comes out,
5	and this is in the heartland of what they were
6	concerned about, which is anything that takes
7	just a little human action to produce more than
8	one shot is what they were getting at.
9	MR. MITCHELL: That's just not the way
10	they wrote the statute. If that's what they
11	were getting at, they should have drafted the
12	statute
13	JUSTICE KAGAN: Shoot
14	MR. MITCHELL: better than what
15	they did. I mean, it depends on whether more
16	than one shot is coming out by a single function
17	of the trigger.
18	And I agree with Your Honor, there
19	the rate of fire of a bump stock equipped rifle
20	approaches the rate of fire of a fully automatic
21	weapon. And there may be good policy reasons to
22	treat these as identical.
23	There may also be good policy reasons
24	to distinguish them. That's ultimately a
25	decision for Congress to make. It's certainly

not a decision for a court or for an 1 2 administrative agency that's charged with 3 implementing the instructions of Congress. JUSTICE KAGAN: I mean, Mr. Mitchell, 4 I will tell you I -- I view myself as a good 5 6 textualist. I think that that's the way we 7 should think about statutes. It's by reading 8 them. 9 But, you know, textualism is not 10 inconsistent with common sense. Like, at some 11 point, you have to apply a little bit of common 12 sense to the way you read a statute and understand that what this statute comprehends is 13 14 a weapon that fires a multitude of shots with a 15 single human action. 16 Whether it's a continuous pressure on 17 a -- a conventional machinegun holding the trigger or a continuous pressure on one of these 18 19 devices on the barrel, I -- I can't understand 20 how anybody could think that those two things 21 should be treated differently. 2.2 MR. MITCHELL: Well, they're treated 23 differently because the statute turns on a 24 single function of the trigger. And the problem 25 for the government is they're not able to change

97

1	the nature of the trigger that currently exists
2	on a semiautomatic rifle simply by adding a bump
3	stock, which is nothing more than a casing that
4	allows the rifle to side slide back and forth.
5	The trigger is exactly the same as
6	what it was before, and the function of the
7	trigger is exactly the same as what it was
8	before.
9	I mean, think of a semiautomatic rifle
10	where someone just has a very quick trigger
11	finger. That could also have a very, very high
12	rate of fire, but it's still one shot per
13	function of the trigger.
14	And that's the problem here the
15	government still is not able to overcome. Every
16	time that trigger functions inside a bump stock
17	equipped rifle, there is one shot and only one
18	shot that gets fired, even though there may be
19	rapid functions that occur consecutively because
20	of the bump stock equipped device.
21	JUSTICE KAGAN: Thank you.
22	MR. MITCHELL: Thank you.
23	CHIEF JUSTICE ROBERTS: Justice
24	Gorsuch?
25	Justice Kavanaugh?

1 JUSTICE KAVANAUGH: In response to a lot of the questions, you've made the point that 2 3 bump stocks were not around as of 1934. And that's a -- a good point for you. 4 But what evidence is there, if any, 5 6 that as of 1934, the ordinary understanding of 7 the phrase "function of the trigger" referred to the mechanics of the gun rather than the -- the 8 shooter's motion? 9 10 MR. MITCHELL: Well, it had to. And 11 the evidence that we can see is the evidence the 12 Solicitor General points out about the fact that 13 there were push triggers in existence at that 14 time. 15 And that function of the trigger, even 16 though you can find legislative history where 17 there seem to be people who think "function of the trigger" means the same thing as "pull of 18 19 the trigger, " those phrases cannot be equated for that very reason. 20 21 JUSTICE KAVANAUGH: I guess I'm asking 22 the opposite. 23 MR. MITCHELL: I'm sorry. 24 JUSTICE KAVANAUGH: Was there any 25 evidence that someone was drawing that

99

1 distinction? 2 MR. MITCHELL: Drawing the distinction 3 between push and pull or --4 JUSTICE KAVANAUGH: No. The distinction between function -- that "function 5 of the trigger" meant something different. 6 7 MR. MITCHELL: I'm not aware of that 8 in the legislative history, but as a textualist 9 \_ \_ 10 JUSTICE KAVANAUGH: Are you aware of 11 that anywhere in kind of communication at the 12 time? 13 MR. MITCHELL: Not at the time, no, 14 because the communication, as we can see from 15 the record, was rather sloppy. People were 16 using "pull of the trigger" as a phrase that 17 they thought was synonymous with "function of 18 the trigger." 19 JUSTICE KAVANAUGH: I quess --20 MR. MITCHELL: And that obviously is 21 not the case. 2.2 JUSTICE KAVANAUGH: Okay. So no one 23 that was saying, oh, "function of the trigger," 24 that's a different phrase than "pull or push" 25 and, therefore, it means something different?

1 Are you aware of anyone who said that anywhere 2 \_ \_ 3 MR. MITCHELL: No, but as --JUSTICE KAVANAUGH: -- in America at 4 5 the time? 6 MR. MITCHELL: I'm not aware of that. 7 But, as a textualist, I don't find that 8 concerning because everybody --JUSTICE KAVANAUGH: Well, if -- as a 9 10 textualist, you have to think about the phrase, 11 not just each word in the phrase. That's --12 MR. MITCHELL: That's right. That's 13 right. 14 JUSTICE KAVANAUGH: Yeah. 15 MR. MITCHELL: And we look at the 16 phrase "function of the trigger," as I was 17 saying earlier, and Justice Gorsuch made this point in some of his earlier questioning --18 19 JUSTICE KAVANAUGH: Yeah. 20 MR. MITCHELL: -- "function of the 21 trigger" --2.2 JUSTICE KAVANAUGH: Yeah. MR. MITCHELL: -- I mean, a trigger 23 is -- we talked about this before -- "trigger" 24 has to be the subject of "function." It can't 25

101

1 be the object or --2 JUSTICE KAVANAUGH: Right, and now -so the follow-on question is just focus on the 3 phrase, and I'm just making the point, I don't 4 5 think anyone said this at the time --6 MR. MITCHELL: Right. 7 JUSTICE KAVANAUGH: -- which doesn't 8 defeat your argument. I'm not suggesting it 9 defeats your argument. 10 MR. MITCHELL: Right. 11 JUSTICE KAVANAUGH: But it would 12 obviously help your argument if people were 13 drawing that distinction, correct? 14 MR. MITCHELL: It certainly would 15 help, but the phrase, given the way it's written 16 right now and the impossibility textually of 17 trying to make "trigger" into an object of the 18 verb "function" --19 JUSTICE KAVANAUGH: Okay. And then no 20 one was drawing the distinction. Why would 21 Congress have drawn that distinction? Your big 22 point, I think, we got to look at 1934, we got 23 to look at what Congress wrote. Why would 24 Congress have drawn that distinction in 1934? 25 MR. MITCHELL: Because they wanted to

1 get the fully automatic weapons that had the 2 push triggers. And if you use "pull the 3 trigger, " you're not going to reach those 4 devices. So they had to say "function of the 5 trigger" to make sure we encompassed those forms 6 of weaponry, as well as the conventional fully 7 automatic weapon. 8 JUSTICE KAVANAUGH: To cover push and 9 pull? 10 MR. MITCHELL: Push and pull, exactly. 11 JUSTICE KAVANAUGH: And how should it 12 be defined now in your view -- you may have just answered this --13 14 MR. MITCHELL: Yeah. 15 JUSTICE KAVANAUGH: -- to cover bump 16 stocks? In other words --17 MR. MITCHELL: So --18 JUSTICE KAVANAUGH: -- if tomorrow 19 Congress said, Mr. Mitchell, how should we write 20 the statute to cover bump stocks since "function 21 of the trigger, " in your view, doesn't do it? 2.2 MR. MITCHELL: Well, I'd have to ask 23 them what else do you want to encompass besides 24 bump stocks. If they want to make it specific 25 \_ \_

1 JUSTICE KAVANAUGH: Just -- just bump 2 stocks. MR. MITCHELL: Well, then I would --3 JUSTICE KAVANAUGH: Just give me a 4 sentence that you think would cover bump stocks. 5 6 MR. MITCHELL: I would provide a 7 statutory definition of bump stocks that tracks 8 as closely as possible the non-mechanical 9 devices that Mr. Cargill has. And I certainly 10 wouldn't say --11 JUSTICE KAVANAUGH: It's not --12 MR. MITCHELL: -- "single function of 13 a trigger." 14 JUSTICE KAVANAUGH: -- great statutory 15 language. 16 MR. MITCHELL: Yeah. 17 JUSTICE KAVANAUGH: You got anything 18 better than that? 19 (Laughter.) 20 MR. MITCHELL: I think you could say 21 any device -- and this may be a little too broad 22 -- but you could say any device that is used to accelerate the rate of fire from a semiautomatic 23 24 weapon. That would probably capture -- that 25 would certainly capture bump stocks. It might

1 capture some other things, but those other 2 things would be similar enough to bump stocks 3 that Congress would probably want to ban them as well, which they --4 JUSTICE KAVANAUGH: Yeah. Back in the 5 6 '30s, some of the state statutes did that, I 7 quess --8 MR. MITCHELL: Yeah. 9 JUSTICE KAVANAUGH: -- at the time. 10 Okay. Last question. You haven't made a Second 11 Amendment or constitutional avoidance argument. 12 In your view, are bump stocks covered by the Second Amendment, protected by the Second 13 14 Amendment? 15 MR. MITCHELL: We didn't argue that because courts are generally loath to decide 16 17 constitutional questions when there's an easy 18 statutory off-ramp. 19 JUSTICE KAVANAUGH: You didn't throw 20 it in as constitutional avoidance, and I imagine that was a considered choice, and I'm curious 21 2.2 what -- what was behind that choice. 23 MR. MITCHELL: There's nothing that 24 prevents this Court from invoking the 25 constitutional avoidance canon on the Second

105

1	Amendment issue because there is a question at
2	least whether this falls within the dangerous
3	and unusual weapons carveout in Heller.
4	We don't have a position on that
5	question because we didn't brief it, and also
б	"dangerous and unusual weapons" is vague enough
7	that it's just not clear to us what the answer
8	would be.
9	JUSTICE KAVANAUGH: Thank you.
10	MR. MITCHELL: Thank you.
11	CHIEF JUSTICE ROBERTS: Justice
12	Barrett?
13	Justice Jackson?
14	JUSTICE JACKSON: So I guess I'm still
15	not clear as to why you believe there's only one
16	meaning of "function of the trigger" in this
17	context.
18	So why couldn't we read the words
19	"function of the trigger" in this statute to
20	mean the function of the trigger is to start a
21	chemical reaction that leads to the expulsion of
22	a projectile? If I read "function of the
23	trigger in that way," I think I come out to a
24	different result than you are positing. So help
25	me to understand why that couldn't be the

```
106
```

1 function of the trigger. 2 You -- in other words -- I know. I'm 3 sorry. 4 MR. MITCHELL: That's okay. Sorry. 5 JUSTICE JACKSON: Confusing question. MR. MITCHELL: Yeah. 6 7 JUSTICE JACKSON: You seem to be saying that the function of the trigger and the 8 9 only one that Congress cared about, that matters for the way this statute reads --10 11 MR. MITCHELL: Right. 12 JUSTICE JACKSON: -- is the movement 13 of the trigger. 14 MR. MITCHELL: No. 15 JUSTICE JACKSON: No? 16 MR. MITCHELL: Not necessarily the 17 movement. 18 JUSTICE JACKSON: Okay. Tell me. 19 MR. MITCHELL: It's what the trigger 20 does --21 JUSTICE JACKSON: Yes. I'm sorry. 22 MR. MITCHELL: -- to cause the weapon 23 to fire. That's --24 JUSTICE JACKSON: Okay. What the 25 trigger does. And I guess --

1 MR. MITCHELL: And it's more than just 2 the movement. 3 JUSTICE JACKSON: -- I'm saying what 4 the trigger does, both in this case, in a bump stock case, and in a machinegun case, is to 5 start a chemical reaction that leads to the 6 7 expulsion of a projectile. MR. MITCHELL: There --8 JUSTICE JACKSON: So --9 MR. MITCHELL: -- there are other 10 11 devices in the firearm that actually do that 12 part. What the trigger does, it releases the 13 powder --14 JUSTICE JACKSON: No, no. No, no. 15 But it's -- it's like -- it's like causation, 16 right? It's like -- it's like Mrs. Palsgraf 17 standing on the scale. 18 MR. MITCHELL: Sure. JUSTICE JACKSON: I mean, the trigger, 19 20 the trigger, you know, the function of it, right, one could say is to start this chemical 21 22 reaction. Now some weapons might do it with a 23 button; some might do it with a pull. 24 MR. MITCHELL: Yeah. 25 JUSTICE JACKSON: Some weapons might

1 do it by moving back and forth quickly, by the 2 mechanics of the gun operating in a certain way. 3 Others might do it by the mechanics of the gun operating in a different way. 4 But I could say that the function is 5 6 to begin the chemical reaction that results in 7 the expulsion of this weapon, and that happens both in the bump stock situation and in this 8 9 situation. So I don't understand why this 10 statute couldn't be read as -- the way that the 11 government is. 12 MR. MITCHELL: Even if -- even if you 13 read the statute that way, Your Honor, I don't see how that wins the case for the government 14 15 because --16 JUSTICE JACKSON: Why not? 17 MR. MITCHELL: Because only one shot is being fired per function of the trigger. So 18 19 it's single --20 JUSTICE JACKSON: No. Single function --21 2.2 MR. MITCHELL: Yes. 23 JUSTICE JACKSON: -- right, if I read 24 the single --25 MR. MITCHELL: Yes.

109

1 JUSTICE JACKSON: There's only a 2 single thing happens --3 MR. MITCHELL: Right. JUSTICE JACKSON: -- to begin the 4 chemical reaction that expels the bullet, right? 5 6 MR. MITCHELL: That expels one bullet, 7 one shot. 8 JUSTICE JACKSON: But then we go into 9 the other part of the statute, "automatically," 10 multiple shots. You can't forget the rest of 11 the statute. That was Justice Kagan's point. 12 MR. MITCHELL: Certainly not. 13 JUSTICE JACKSON: So, when we put 14 those together, the work of the function of the 15 trigger, I think, could be to start the chemical 16 reaction that then results in the automatic 17 shoot -- more than one shot coming out of the 18 gun. Why can't I interpret it that way? MR. MITCHELL: If that's what actually 19 20 were happening, then I think you would have a plausible argument for why this is a machinegun. 21 2.2 JUSTICE JACKSON: But that's just 23 because --24 MR. MITCHELL: That's just not what 25 happens --

1 JUSTICE JACKSON: But -- but --2 MR. MITCHELL: That's not the way it 3 works. JUSTICE JACKSON: -- but that's just 4 because you're interpreting the statute to say 5 you have to -- it has to be about the mechanics. 6 7 MR. MITCHELL: No. JUSTICE JACKSON: And what I'm trying 8 to understand is how that's consistent with 9 Congress putting "modifications" in here. 10 11 MR. MITCHELL: I'm just saying as a --12 right. 13 JUSTICE JACKSON: And that -- can I --14 MR. MITCHELL: Sorry. 15 JUSTICE JACKSON: -- can I -- can I 16 just change the -- a little bit? 17 MR. MITCHELL: Mm-hmm. 18 JUSTICE JACKSON: If you're right that 19 Congress cared about exactly the mechanistic 20 operation, then I'm confused as to why this 21 statute also talks about modifications, because 22 that suggests that Congress was not hung up on 23 exactly how this gun operates. We're -- we're 24 sweeping in all kinds of things, things that 25 originally weren't designed to work this way at

111

1 all, right? We're -- we're -- we're allowing 2 for machineguns to include things that can 3 modify something that didn't operate this way at all into a machine -- into the kind of thing 4 where a chemical reaction kicks it off and it 5 6 automatically fires more than one shot. 7 If that's what I'm thinking about, 8 then I quess I don't understand your hang-up over how this operates mechanistically. 9 10 MR. MITCHELL: Well, the test under 11 the statute is whether it can be readily 12 restored to fire automatically more than one shot by a single function of the trigger. It's 13 not whether it can be modified to fire 14 15 automatically more than one function of the 16 trigger. And if you --17 JUSTICE JACKSON: All right. Well, 18 I'll look that up. 19 MR. MITCHELL: Yeah. 20 JUSTICE JACKSON: Yeah. 21 MR. MITCHELL: And just to get back to 22 your earlier question, Justice Jackson --23 JUSTICE JACKSON: Mm-hmm. Yes. 24 MR. MITCHELL: -- it's factually 25 incorrect to say that a function of the trigger

112

1 automatically starts some chain reaction that 2 propels multiple bullets from the gun. A 3 function of the trigger fires one shot. Then 4 the shooter must take additional manual action. 5 JUSTICE JACKSON: I -- I understand --6 MR. MITCHELL: All right? So there's 7 no --8 JUSTICE JACKSON: -- that's your 9 argument. Thank you. 10 MR. MITCHELL: Thank you. 11 CHIEF JUSTICE ROBERTS: Thank you, 12 counsel. 13 MR. MITCHELL: Thank you. 14 CHIEF JUSTICE ROBERTS: Rebuttal, Mr. 15 Fletcher? 16 REBUTTAL ARGUMENT OF BRIAN H. FLETCHER 17 ON BEHALF OF THE PETITIONERS 18 MR. FLETCHER: Thank you, Mr. Chief 19 Justice. 20 So I take from my friend's answers today that he does not seriously dispute that a 21 22 rifle with a bump stock does basically the same 23 thing as a machinegun and is basically just as 24 dangerous as a machinegun. 25 But his argument is the words that

1 Congress wrote in 1934 just don't cover it because the words "single function of a trigger" 2 3 unambiguously refers to the movement or the 4 mechanics of the trigger, without regard to the action of the shooter. 5 6 We are not making a Holy Trinity 7 argument. If that is what the words meant, then we would be stuck with the words. We are not 8 9 asking you to depart from the plain language. 10 We're asking you to give it its natural reading. 11 And I think, to understand why the 12 statute not only can be but should be read our 13 way, it's worth thinking about how many people 14 you have to disagree with in order to adopt my 15 friend's reading. 16 So, first of all, on the grammar, 17 Judge Ho, at page 56a of the Petition Appendix, 18 explains why it's perfectly natural to read 19 "function of the trigger" to refer to what the shooter does to the trigger, not to what the 20 21 trigger does by itself. 2.2 Second, Justice Kavanaugh, you asked 23 about contemporaneous usage. There's a lot of 24 contemporaneous usage of people using the term 25 "pull of the trigger" to be synonymous with

1 "function of the trigger." That makes perfect 2 sense if we're talking about what the shooter 3 does, because the way the shooter activates most, not all, but most triggers is by pulling 4 on them. 5 6 But I think my friend conceded that 7 usage is all inconsistent with his reading. And as you pointed out, there is no evidence that 8 9 anyone at the time or ever since, until the development of devices like these, ever thought 10 11 that "function of a trigger" meant mechanical 12 movement independent of any action by the 13 shooter. 14 It's also worth emphasizing that even 15 if you looked at what the trigger does by 16 itself, what the trigger does is accept some 17 input by the shooter. 18 Justice Kagan, you asked about what 19 about a voice-activated trigger? You could also 20 have a trigger that works by swiping a touchscreen. Those triggers don't necessarily 21 2.2 have any moving parts. 23 On our understanding, we say, is there 24 an act of the trigger that -- of the shooter 25 that initiates the firing sequence, a spoken

115

command, a swipe on the touchscreen, it works
 perfectly.

3 On my friend's understanding, I have no idea how he would deal with a firearm that 4 had a trigger that did not have moving parts. 5 6 We've also talked some about 7 automatically, and I take my friend's point to be that he thinks because there's some continued 8 manual input, the pushing forward, it can't be 9 10 automatic. But automatic just means by way of a 11 self-regulating mechanism. It doesn't mean it 12 eliminates all manual input. It just means that it eliminates some of it. 13 14 And contrary to what my friend said, a 15 bump stock does eliminate manual action that the 16 shooter has to take. With a semiautomatic 17 weapon, you have to pull and release the trigger 18 with each shot. With an auto -- with a bump stock the bump stock allows the recoil from each 19 20 shot to automatically push the rifle back, 21 disengaging the trigger, eliminating the need 2.2 for the shooter to manually release, and then it 23 channels the forward and backward movement in 24 exactly the right way to allow a continuous

25 firing cycle to continue.

1 Now I think it's also telling, some of 2 the gymnastics with respect that my friend has to do in order to deal with all of the other 3 hypothetical and actual devices that have been 4 out there because I think he recognizes that the 5 Akins Accelerator, the LV 15, the electronic 6 7 reset assist device, the fishing reel in Camp, all of these workarounds have to be covered by 8 9 the statute because it's just not plausible to think that Congress enacted something subject to 10 11 such easy evasion.

12 But the only way he can say that those 13 are covered is by engaging in very implausible 14 understandings of what the trigger is. I think, 15 for the Akins Accelerator, he suggested that 16 maybe the trigger is the spring in the back of 17 the rifle rather than the lever that the -- the 18 shooter actually pulls to start the firing 19 sequence.

20 On the black box hypothetical, I'm 21 still not sure what his answer is, but I think 22 it must be that the button is the trigger the 23 first time it moves up and down, but then it 24 stops being the trigger when it keeps moving up 25 and down afterwards.

1 I think those are all very implausible 2 interpretations that this Court should not give 3 to a statute if there's another reading available, and our view is that there is another 4 reading available. 5 6 In short, we think Congress in 1934 7 wrote this statute not just for the kinds of devices that existed then but for other kinds of 8 devices that could be created in the future that 9 would do the same thing. 10 11 It enacted and strengthened these laws 12 because it did not want members of the public or our nation's law enforcement officers to face 13 14 the danger from weapons that let a shooter spray 15 many bullets by making a single act. 16 That's exactly what bump stocks do, as 17 the Las Vegas shooting vividly illustrated, and we think this Court should give the words 18 19 Congress wrote their full, natural meaning and 20 hold that they encompass bump stocks. 21 Thank you. 2.2 Thank you, CHIEF JUSTICE ROBERTS: counsel. The case is submitted. 23 24 (Whereupon, at 11:34 a.m., the case 25 was submitted.)
